CANNELLS' SEED GUIDE, 1910.

NOVELTIES IN FLOWER SEEDS, 1910.

CANNELLS' NEW PRIMULAS.

We have much pleasure in again offering the following Novelties, and we can, with every confidence, recommend them as worthy of cultivation. Our collection, as is well known, contains the choicest in existence.

	Per pkt.—s. d.
CHAMELEON —Of the true <i>Stellata</i> or <i>Lady</i> type of flowers, exceedingly free flowering. The young blossoms are of a salmon shade, changing with age to a pleasing tint of cerise-lake; good habit 1s. 6d. & 2 6	
COUNTESS OF RADNOR —Producing a wonderfully bright and effective display of red-coloured flowers in great profusion; habit perfect. This belongs to the <i>Pyramidalis Stellata</i> type 1s. 6d. & 2 6	
GLORIOSA —Pleasing and effective star-shaped flowers of a rich lake colour, remarkable for its colour when massed; free habit 1s. & 1 6	
HERBERT BENNETT —A pretty fern-leaved variety, producing <i>sinensis</i> flowers of an attractive shade of blue; much admired 1s. 6d. & 2 6	
HYBRID STELLATA (White Mixed)—These have been saved from our best kinds, and some splendid large flowers and lovely dark foliage will be the result 1s. 6d. & 2 6	
MASTERPIECE —Of the <i>Star</i> or <i>Lady</i> type, of pyramidal habit of growth in flower heads, blossoms of a clear blue. This will prove more satisfactory than the usual class of <i>Blue Lady</i> 1s. 6d. & 2 6	
MRS. GREGORY —This will be found a most useful semi-double variety, and producing good sized flowers of a pleasing shade of salmon 1s. 6d. & 2 6	
MRS. C. F. RAPHAEL —A good <i>sinensis</i> variety, beautiful large flowers of a pretty shade of pink: has been much admired. 2s. 6d. & 3 6	
QUEEN ALEXANDRA —Can truthfully be described as one of the finest pure white <i>sinensis</i> yet in commerce; deep orange centre, dark green foliage: a most perfect habit; good 2s. 6d. & 3 6	
SCARLET GEM —We are quite confident that all purchasers will be pleased with this useful and glowing coloured variety: of the true <i>Lady</i> type and perfect pyramidal habit; bright scarlet-crimson flowers; very free: splendid 1s. & 1 6	
ANCHUSA CAPENSIS ATROCÆRULEA —A new well-fixed variety of this very pretty hardy annual; flowers of an extremely dark ultramarine blue, and perfectly distinct from the deep blue flowered typical species. 1½ ft. 1 0	
ANTIRRHINUM MAJUS NANUM, FIRELIGHT —A most striking and shining colouring among <i>Snapdragons</i> 1 0	
— PRINCE CHAMOIS —A most distinct and showy variety: a golden chamois shade 1 0	
ASTER, AURORA —Yellow, changing to old rose, shades up to the present unknown in the many classes of Asters. In the bud state the flowers somewhat resemble the <i>Comet</i> class, with rather twisted petals, and perfectly yellow, but as the flowers develop the petals flatten a little, and the whole flower changes into a charming shade of old rose; of pyramidal habit 1 0	
— CACTUS, CELESTINE —A pure soft lilac of unusual beauty; flowers are larger, petals narrower and more twisted than in the carmine-rose variety introduced last year 1 6	
— GNOME, Rose —A charming rose-tinted variety: stiff compact habit; stands the rough weather of the late autumn better than any other dwarf Aster; very free 1 0	
— HERCULES, Rosy Lilac —This with good culture is one of the most refined of all Asters; of compact semi-dwarf habit, 15 to 20 in. high; flowers a delicate rosy lilac 1 0	
— HOHENZOLLERN, Reddish Lilac —Producing large flowers of best <i>Comet</i> form; a grand advance on the <i>Queen of the Market</i> 1 0	
— RAY, Fiery Scarlet —The brightest colour in this beautiful class; beautiful and attractive 1 0	
— RECORD, Bright Rose —Large chrysanthemum-formed flowers; very useful as a pot plant: a nice showy rose colour 1 0	
— OSTRICH FEATHER, Brilliant Rose, tipped White. 1 0	
— — — — — Coppery Rose, tipped White. 1 0	
— — — — — Ruby. 1 0	
} Three beautiful sorts in this most valuable class ... each	
— VICTORIA, Giant Azure Blue —Flowers beautifully imbricated and very large; of pyramidal habit, and grows to a height of 2 ft. A pretty and delicate colour, really grand for exhibition and cultivating in pots 1 0	
— HYBRIDA, Flowers Yellow —Presumed to be a cross between <i>Aster Plurimicoides</i> and <i>Solidago Spectabilis</i> . Begins to flower from the month of August and continues until cut down by the frost. Small numerous flowers of a decided lemon colour 1 0	

CANNELLS' SEED GUIDE, 1910.

	Per pkt.—s.	d.
ASTILBE, HYBRIDA ROSEA —A pink-coloured variety of this lovely hardy perennial. The flowers of the seedlings vary in all shades of pink, and the foliage also shows a great diversity. Of great decorative value	1	6
BEGONIA, GRACILIS, PRIMA DONNA —A vigorous growing bedding variety. Flowers uncommonly large, of a clear rose shading to earmine towards the centre; bright green foliage with a metallic hue. A superb plant for bedding and pot culture, comes true from seed. 10 in. high... ..	1	0
BELLIS PERENNIS, WHITE RANUNCULUS DAISY —A pure white flowering variety, large, and on long stems, and very double blossoms	1	0

GIANT CHABAUD CARNATION, DUCHESS OF SAXONY-COBURG-GOTHA.

BEGONIA GRACILIS, PRIMA DONNA.

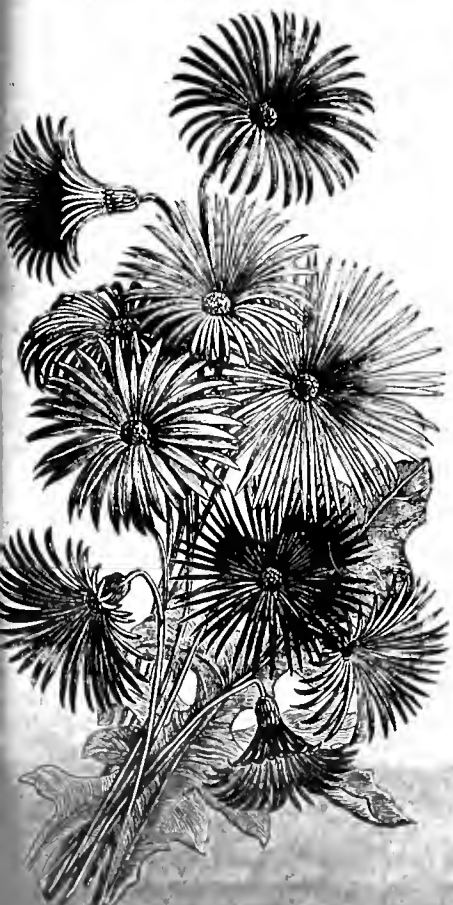

BELLIS PERENNIS, RANUNCULIFLORA ALBA.

- CALLIOPSIS NANA COMPACTA ATROPURPUREA STELLA**—Of compact habit of growth, and narrow leaves of a dark metal green. Elegant star-like flowers of a dark blue colour, and continues to blossom from April till the end of June 1 0
- CARNATION, AMERICAN PERPETUAL**—Saved from the best varieties, and which reproduce, if not exactly the types, equivalent flowers to a large percentage 2 0
- **GIANT CHABAUD, DUCHESS OF SAXONY-COBURG-GOTHA**—Regarding size and beauty of flowers this new pure white variety stands successfully in comparison with the best American kinds. Long firm erect flower stems. Their blooming time commences six months after sowing. Comes true from seed also in colour and being double 1 6
- COSMIDIUM BURRIDGEANUM, ORANGE CROWN**—A very handsome new annual, elegant many-branched bushes, graceful linear foliage. Ray florets of flower golden yellow with a broad conspicuous circle of a rich orange around the disc. Lasts well in water, and therefore useful for cutting purposes... .. 1

CANNELLS' SEED GUIDE, 1910.

- DIANTHUS LACINIATUS FL. PL. LUCIFER**—Nicely fringed double flowers of an intense orange-scarlet, a dazzling colour in full sunshine, and the most striking of all red-flowered annual Pinks. 1½ ft. high 1 0
- DELPHINIUM CHINENSE, TOM THUMB, ULTRAMARINE**—A new dwarf *Chinese Larkspur*, excellent for borders, large deep ultramarine blue flowers; bushy habit. 1 ft. high. When sown early the seedlings will be in full bloom during the whole season 1 0
- GERBERA JAMESONII HYBRIDA**—The horticultural world is in the first instance indebted for these grand new plants to Mr. Lynch, curator of the Botanic Gardens at Cambridge. By hybridizing the beautiful *Gerbera Jamesoni* from the Transvaal with *G. viridifolia*, and then re-crossing the progeny, Mr. Lynch added to the brilliant orange-scarlet of the type a series of fine new colours, and with the further endeavours of a clever French specialist, who has taken these plants in hand, we have now a galaxy of colours of incomparable delicacy and richness, in which an infinity of tints, from pure white through yellow, orange, salmon, rose, cerise, and ruby red to violet are represented. The starry lightness of these beautiful flowers and their being borne on long and rigid stalks, renders them admirably suited to all kinds of floral decoration, and nothing in fact can excel them for arrangements of the highest artistic character. The flowers have besides the very valuable quality of travelling well and of preserving their freshness for a fortnight, more or less, according to circumstances. Being somewhat hardier than the parent form, these hybrids may be used in sunny spots for garden decoration from the month of May to September, but for cut flowers they are best grown under glass. They are most easily propagated by seed, which may be sown at any time in slight heat in small well-drained pots, say 48s, in sandy peat, which must be kept very moderately moist. It is recommended to place each seed with the pointed end upwards, and just peeping over the surface of the soil. The young plants should be kept on a moderate hot-bed and re-potted from time to time (latterly into deep pots), using a mixture of equal parts of good loam and sandy peat, and may be had in bloom from seeds in 7 to 9 months. 1s. 6d. & 2 6
- GLOXINIA HYBRIDA GRANDIFLORA, PSYCHE**—Large horizontal flowers, slightly undulated at the edges and borne on stiff stems; ground colour white tinged carmine, lower central lobe shows a distinct purplish scarlet marking, bordered bright carmine, and minutely spotted deep carmine on the yellowish throat. An exquisite colouring and of great effect 2 6
- CRASSIFOLIA CRISPA, WATERLOO**—Giant flowering, light green foliage, flowers very large, seven-lobed—most varieties having only five—undulated and curled of a beautiful blackish purple, turning into a bright crimson towards the edges 2 6

GERBERA JAMESONII HYBRIDA

IMPATIENS HOLSTII NANA AMABILIS.

GLOXINIA HYBRIDA GRANDIFLORA PSYCHE.

IMPATIENS HOLSTII NANA AMABILIS
—A dwarf compact variety, with white rosy-carmine tinged and red centred flowers; very pretty 1 0

VERMILION ORANGE
—Producing lovely bright vermilion-orange flowers in the greatest profusion throughout the season. Planted outdoors in a half-shady position or grown in pots this will be found very effective and showy 1 6

LOBELIA, ILLUMINATION (CARDINALI FULGENS)—This perennial new hybrid obtained by crossing *L. cardinalis* with *L. Queen Victoria*, attains a height of 2½ to 3 ft., and produces but one strong rather monstrous spike of brilliant scarlet flowers 1 6

CANNELLS' SEED GUIDE, 1910.

	Per pkt.—s. d.
LOBELIA HYBRIDA, MIRANDA —Flowers bright rosy purple and a sharply defined white eye; a splendid trailing variety, specially suitable for hanging baskets	1 0
NEMESIA LILACINA, N.E. Br. —A new and distinct annual from German South-west Africa, differing essentially from all others by its growth and its small Snapdragon-like flowers, which vary in colour from light pink to dark pink and rosy lilac with a pale yellow centre; foliage lanceolate serrate. The plants continue to bloom continuously from June to October... ..	1 0
PAPAVER ALPINUM SEMI-PLENUM —This mixture of semi-double varieties of the graceful miniature Alpine Poppy contains white, pink, yellow, and orange tints; beautiful for rockwork or miniature pots	1 0
PHLOX DRUMMONDII HORT. SALMONEA STELLATA —The flowers borne in immense trusses are unusually large and of a pleasing salmony rose, with a clear white centre; very attractive for bedding	1 0
NANA COMPACTA RADIATA, STELLA —Of very uniform growth, with bright star-like flowers; charming for pots or dwarf groups	1 0

POPPY, CHARLES DARWIN.

POPPY, CHARLES DARWIN—An annual Poppy remarkable for the quite new and unique colour of its numerous flowers, the smooth-edged petals being of a strikingly fine rich dark purple, each with a large velvety black spot at base of florets. A dense wreath of white anthers produces a fine contrast with the extraordinary colour of the petals ... 1 0

— **VIRGINIAN**—This new large-flowering single Poppy of the annual class produces beautiful large white flowers with fringed soft pink edges. Of charming effect when used as cut flowers for vases, and especially when picked as a colour-showing bud in the morning, the blossoms then last for a considerable time ... 1 0

PRIMULA, OBCONICA GIGANTEA COMPACTA—Colours vary in lilac and pink shades; compact habit, and bearing their large flower trusses on short stiff stems; free, above the luxuriant foliage ... 1 6

SALVIA PATENS COMPACTA NANA—Forms many-branched bushes of dark green foliage, above which are borne the splendid flower spikes in the greatest profusion. The individual flowers are rather larger than those of the type, but present the same unique and rich ultramarine blue colouring; very effective for pot culture and bedding... 1 6

SALVIA SPLENDENS NANA COMPACTA, TRIUMPH OF ITALY—Of compact habit of growth, and growing about 20 in. in height. The bracts are of the usual brilliant scarlet colour, but the flowers are of a splendid rosy lilac colour; quite a remarkable combination of colouring ... 1 6

— **PYRAMIDALIS**—Differing from all others by its pyramidal pillar-like growth; flowers large, of the most intense scarlet; spikes long. For pot culture, beds, and borders; gorgeous and effective ... 1 6

SILENE PENDULA, LILAC QUEEN—A charming counterpart to *Dwarf Queen*, which it equals perfectly in dwarf growth and compact bushy habit ... 1 0

STOCK, GIANT NICE, ABUNDANCE—The characteristic features of this novelty are the dwarf growth and the great abundance of bloom. It is of branching habit, 12 to 15 main branches are produced on the average, and each of these produce a quantity of small side branches, and which are all well garnished with trusses of rosy carmine flowers. A plant in full bloom measures fully 2 ft. in height and breadth. About 50 to 60 per cent. of double flowers may be expected. This variety can be cultivated either as a summer or as a winter Stock, and by sowing early in June it may be had in flower by Christmas. Its freedom of bloom, beautiful colour, and general appearance make it one of the best kinds for bedding and general outside culture ... 1 0

— **IMPROVED WHITE NICE, MME. RIVOIRE**—The flowers are very large and the stems long and spreading, and when in full flower has a good pyramidal habit. A splendid improvement, and one of the most beautiful white varieties that exists ... 1 0

— **TEN WEEK, Light Blue**—Individual flowers are of a large size, and of a brilliant light blue. This variety produces a higher percentage of double flowers than the original type; of great value for garden display and cutting purposes, and bearing a continuous succession of flowers ... 1 0

CANNELLS' SEED GUIDE, 1910.

SWEET PEAS, NEW VARIETIES.

	Per pkt.—s. d.
AURORA SPENCER —A waved form of the old variety of this name; a splendid flower 6d. & 1 0	1 0
CONSTANCE OLIVER —A delicate pink <i>Spencer</i> , suffused cream 1 0	1 0
EARL OF PLYMOUTH —Pale soft buff self, waved 0 6	0 6
GEORGE STARK —Deep rich scarlet, of an intense brilliancy; of grand substance, sunproof, flowers in threes on good stems, waved 1 0	1 0
LUCY HEMUS, IMPROVED —A charming and distinct bicolor of a soft shade of pink; very waved and wax-like 1 0	1 0
LADY ALTHORP —White, waved, turning to blush; fine flower 0 6	0 6
MARIE CORELLI —Large flowers, of a brilliant rose-carmine or red, and uniformly of true <i>Spencer</i> form; standard large and round and wavy; strong long stems, usually bearing four flowers each 6d. & 1 0	1 0
MARJORIE WILLIS —Glowing rose, with white base 0 6	0 6
MIRIAM BEAVER —A glowing but soft apricot, tinted, shaded and suffused with lemon; entirely distinct in colour 6d. & 1 0	1 0
OTHELLO SPENCER —A rich deep maroon, blooming profusely, and of <i>Spencer</i> type; the vine is vigorous, and generally bears three or four large waved flowers on a stem 0 6	0 6
PARADISE IVORY —Ivory-white, waved 0 6	0 6
PICOTEE SPENCER —White, beautifully edged carmine, large and well waved, four flowers on a stem 1 6	1 6
SENATORS SPENCER —Deep claret and chocolate, striped and flaked, on a ground of light heliotrope; true <i>Spencer</i> form; stems are long, usually four flowers on each 6d. & 1 0	1 0
W. T. HUTCHINGS —When in bud of a decided buff colour, but when fully expanded light apricot, overlaid with a beautiful blush pink; a strong grower, and flowers of the largest size, three or four on a stem, wavy and crinkled; a true <i>Spencer</i> , of perfect form 6d. & 1 0	1 0
MRS. DUNCAN —A fine crimson scarlet <i>Spencer</i> ; fine shape, beautiful colour, and sunproof 1 0	1 0
MRS. TOWNSEND —White ground, margined violet; flowers large and beautifully waved 1 0	1 0
VERBENA, MAMMOTH, ROSE QUEEN —Recommended as the best of all mammoth varieties: flowers exceptionally large, of a bright pink colour 1 0	1 0
WINNIA HAAGEANA HYBRIDA, PERFECTION —New compact growing varieties, with extremely double flowers varying in colours from pure white to dark red and scarlet, including self and bi-coloured flowers. 60 to 70 per cent. will reproduce double flowering plants 1 0	1 0

NOVELTIES IN VEGETABLES.

BRUSSELS SPROUT, DARLINGTON —A new and distinct variety, of fairly dwarf habit of growth, and particularly hardy. The Sprouts are large and solid, of delicious flavour, and though particularly early will keep compact and firm, being protected with foliage of a drooping habit which completely protects the Sprouts from frost. The Sprouts can be depended upon to keep sound till late in the spring. Splendid both for exhibition and general purposes 6d. & 1 0	1 0
BEAN, RUNNER, COUNT ZEPPELIN —The fields of this variety during last summer caused undivided admiration from all visitors, and Count Zeppelin, after having convinced himself of the value and quality, willingly consented to give his name to this bean. It is of robust growth and the pods are produced quite evenly from top to bottom, and continue in perfection for a long time. The Beans are of a delicious flavour 1 0	1 0
CABBAGE, MONARCH —Suitable for spring or autumn sowing. It is of medium size, deep green, and of compact habit, somewhat conical in shape, with few outside leaves, very rapid in growth therefore tender and crisp and the flavour delicious. May be sown successionally for crops throughout the spring, summer, and autumn. Strongly recommended for private and market garden work, and also as an exhibition variety 1 0	1 0

PEA, SCIMITAR TOM THUMB.

PEA, SCIMITAR TOM THUMB—Every plant produces from four to six stems, measuring 12 in. in length, and yielding an enormous quantity of handsome curved pods, produced mostly in pairs, and containing from 9 to 12 peas. The foliage is dark green and of good appearance. In order to obtain the best results, seed should be sown thinner than usual, as owing to its close branching habit immediately above the ground the plants soon become crowded. Will undoubtedly prove unsurpassed for market purposes, preserving, or canning, as well as for gentlemen's gardens 1 0

- Per pkt.—s.
- TOMATO. BALCH'S FILLBASKET**—A most healthy and vigorous cropper, yielding from 10 to 20 lbs. of fine fruit per plant, ripens its fruit early, setting well even in dull weather; medium-sized well-formed fruits; an ideal market variety 1
- **PARKER'S ZENITH**—Early and prolific, setting freely; fruit round and smooth, of a beautiful colour, just the right size, and carries a good heavy crop; of delicious flavour, and a good traveller. Highly commended by several prominent salesmen in the London markets 1
- **INVICTA**—A splendid variety, and for quality and quantity unsurpassed. A strong grower, short jointed, a continuous cropper, and bears from June to December; of excellent flavour, and rich deep colour, which is very pronounced and retained right up to the last picking in early winter 1

CANNELLS'

One-and-Only Tree Wash

IS OF ENORMOUS IMPORTANCE TO GARDENERS.

*For it eradicates all Fungoid and Insect Parasites and Moss from Trees,
Roses, &c., making all the Foliage bright, Bloom on Fruit beautiful.
What makes it more valuable it being Non-Poisonous.*

To 1 gallon of **The One-and-only Perfect Wash** add 32 gallons of clear cold water, well stir and apply.

To $\frac{1}{2}$ gallon add 16 gallons of clear cold water, well stir and apply.

To $\frac{1}{4}$ gallon add 8 gallons of clear cold water, well stir and apply.

And so on to make the quantity required. Well mix it and apply with an ordinary fine syringe or Vermorel's "Eclair" Knapsack for Spraying, which we shall be pleased to supply at £2 each.

PRICE—Per One Gallon, 3s. Per Half-Gallon, 1s. 9d. Per Quarter-Gallon, 1s.
Per 10 Gallons, 27s. Per 50 Gallons, £6 10s. Per 100 Gallons, £12.

DRUMS EXTRA.

$\frac{1}{4}$ gallon, 3d.; $\frac{1}{2}$ gallon, 4d.; 1 gallon, 6d.; 2-gallon drums, 2s. 3d.; 3 gallons, 2s. 6d.
4 gallons, 3s.

Drums allowed in full, if returned carriage paid.

Gardening is an enjoyment and occupation for which no man can be too high or too low."—*Earl of Carlisle.*

"Good Seed is one of the certainties for a Good Crop."

Other varieties not enumerated can be supplied at advertised prices.

For Collections of Vegetable Seeds, see previous page.

CANNELLS' SELECTED ENGLISH WONDER.

The best all round Pea in cultivation.

GARDEN PEAS.

All carefully selected and Hand-picked.

Pints can also be supplied of all the Varieties in List.

CULTURE.—The earliest varieties may be sown about the second or third week in November, or first week in December, another sowing in January, and continuous sowings in the order they stand, every three weeks, up to the end of July. Sow in rows four to seven feet apart (according to height, which varies wonderfully): when about 5 or 6 inches above ground, thin out if required, and properly stick.

By sowing seeds of some of the early kinds in July, a late picking of Peas may be had until the frost sets in.

The general height is here given of the various kinds of Peas, but, of course, the season and richness of the soil will cause a difference.

Our "One and Only Wash" is a complete eradicator of *Mildew* wherever it touches.

SECTION I.; or EARLIEST VARIETIES.

Laxtonian.—One of the earliest Marrowfat Peas in existence, being ready to gather several days before *Gradus*. The pods are large and well-filled. A wonderful hardy and vigorous grower. Height, 1½ foot. In scaled half-pint packets, 1s. 6d.

	Height in feet.	Per qt. s. d.		Height in feet.	Per qt. s. d.
Cannel's Selected English Wonder —Difficult to beat as a dwarf wrinkled early variety ...	1½	2 0	Gradus —Large-podded wrinkled variety, good for table and for show: pods well filled ...	3	2 0
Edwin Beckett —A Marrowfat Pea. For pots it is most useful. Can be relied upon for exhibiting at early shows. Heavy cropper; flavour superb ...	3½	2 0	Carters' Mayflower —A prolific Marrowfat. Long pointed pods. Seed wrinkled ...	1½ to 2	2 0
The Pilot —Vigorous branching habit. Deep green peas of exquisite Marrowfat flavour. Of hardy constitution, and may be sown during the autumn to obtain early results in spring. Award of Merit, R.H.S. ...	3	2 0	Chelsea Gem —Compact, short-jointed habit; pods well filled; first-rate quality; wrinkled; adapted for forcing ...	1	1 8
Cannel's Ascendant —Early marrow. Large, fine-shaped well-filled pods early in the season; much admired; sturdy habit, and flavour all that can be desired ...	3½	2 0	Early Sunrise —A first-rate white wrinkled Marrow, suitable for sowing late or early; fine flavour ...	2½	1 0
			Exonian —An early wrinkled variety of good quality ...	3½	1 6
			May Queen —Dwarf, early, fine Marrowfat flavour ...	3	1 8
			Wm. Hurst —A useful early dwarf kind ...	1	1 8
			William the First —Most productive; rich, sweet flavour ...	3½	1 4

We can also supply other varieties not offered in this List.

6 quarts in 6 best kinds	8/6
6 pints in 6 „	5/0

BEANS, TALL KIDNEY RUNNER or CLIMBING.

CULTURE.—Sowings may be made in April, under glass, and the plants put out about the middle of May where they are to stand. If, however, they are to be sown in the open ground, the first week in May and again in June and July. When thickly mulched and watered they will bear heavily. They should be occasionally topped, to induce side growth, and if possible stakes or supports of some kind should be used, as it allows of much finer growth and increased production of pods.

	Per quart.—s. d.
Scarlet Emperor —A grand variety for exhibition purposes, producing enormous pods, often measuring 15 inches in length per pkt., 1s.; per pint, 2s. 6d.	4 6
Ne Plus Ultra —One of the best for exhibition and main crop; pods of splendid form ...	2 0
White Czar —An enormous podded white runner Bean, are very thick, fleshy, and almost stringless; flavour delicate ...	2 0

	Per quart.—s. d.
Cannells' Empress —A most perfect exhibition kind, splendid shaped pods, and flavour all that can be desired per pint, 1s. 6d.	—
Cannells' 1st Prize Scarlet —Long pods, and tender flesh; a heavy cropper; an excellent exhibition variety ...	1
Giant White —A wonderful cropper, long pods, which are very tender; a capital exhibition variety ...	1
Painted Lady —Very handsome, scarlet and white flowers; very ornamental as well as useful ...	1

BEANS, FRENCH or DWARF KIDNEY.

CULTURE.—Sew in boxes or pots in a frame, for planting out after being carefully hardened off at the end of May, and again, in the open ground, in May and June, and for late crops up to the end of July. For forcing purposes sowings should be made in pots, under glass, from December to April. The same applies to these as the Runners respecting mulching and watering in dry seasons.

	Per quart.—s. d.
Cannells' Avalanche —Dwarf, robust growing, one of the earliest, and the crop prodigious; fine flavour; distinct ...	2 0
Canadian Wonder —Prolific; dwarf and compact habit, and pods being of splendid exhibition shape, great length, and delicate flavour ...	1 4
Ne Plus Ultra —Distinct variety for early and general use; extremely productive, fine flavour ...	1 4

	Per quart.—s. d.
Earliest of All —Strong, vigorous grower; pods are long, broad, and fleshy; excellent flavour; useful for very early forcing or for general crop. 18 to 24 inches high Per pint, 1s. 6d.	—
Negro Long Pod —Very fine cropper ...	1

Other kinds can be supplied.

BEAN, CLIMBING FRENCH.

Tender and True—It grows 6 or 7 feet high, bears a tremendous crop of long, straight, fine pods, the quality being first class, seeds same shape and size as the *Canadian Wonder Dwarf Beans* ... per quart

CANNELLS' SEED GUIDE, 1910.

BEANS, BROAD.

CULTURE.—For an early crop, a sowing should be made of *Mazagan* in October or November on well-drained soil. The main crop should be sown in February, and others to follow up to the end of May. Sow in drills, about 2 inches deep, the beans to be 3 inches apart, and the drills 2 to 3 feet apart. To ensure well-filled pods it is a good plan to pinch off the leading tops as soon as the lower pods begin to set.

	Per quart.—s. d.		Per quart.—s. d.
Cannells' Green Hercules —Delicately-flavoured, and a fine improvement. A most desirable and profitable variety ...	1 0	Early Mazagan —The best for the first sowing ...	0 8

Six best sorts, 1 quart of each, selection left to us, 5s. 6d.

Six best sorts, 1 pint of each, selection left to us, 3s.

BEANS, WAX POD or GOLDEN BUTTER.

Culture.—Should be sown during March and April in boxes or pots under cover, transplanting into open ground when all danger of frost is over; can be sown outdoors from May to the end of July. The pods are of a beautiful creamy colour, stringless, tender, and of a rich flavour. Should be boiled whole.

RUNNER.

Mont d'Or—Long golden coloured pods; very tender and delicious ...

DWARF.

Mont d'Or—Beautiful golden-yellow stringless pods of excellent flavour ...

ARTICHOKE (Globe).

CULTURE.—Sow in March or April in drills, 18 inches apart, and transplant 3 feet apart each way; or seed can be sown in a gentle heat, picked off into small pots when large enough, gradually hardening them until the end of May, and then plant out in the beds already prepared for them. The first season they will only produce a partial crop; but as it is a perennial, after being once planted, the heads continue to bear for several years. So as to secure fine heads they require good treatment; the soil should be rich, deep, and moist, and protected in winter by placing straw or other dry material closely round the stems. It is advisable to cut the plants down after the heads are taken.

	Per oz.—s. d.		Per quart.—s. d.
Cannells' Perfection Green —A splendid selection, perfect formed heads and delicate flavour ...	1 0	Jerusalem Artichoke (<i>Helianthus Tuberosus</i>), not being produced from seed. Roots are offered on page 20.	
Large Purple Globe —Very useful ...	1 0	Jerusalem Artichoke —White skinned, see page 20.	
		Chinese Artichoke , see <i>Stachys Tuberifera</i> .	

For plants, see page 20.

ASPARAGUS (Seed).

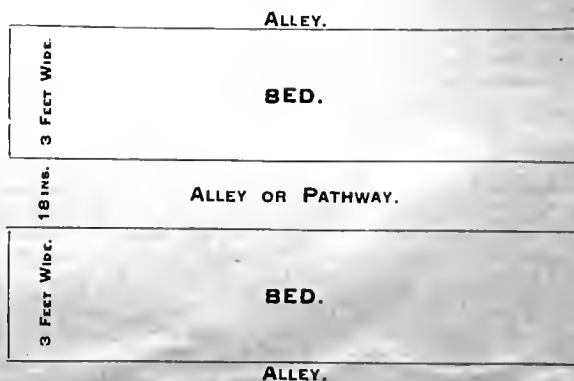

CULTURE.—There is no vegetable more delicious. Choose the highest and lightest ground in the kitchen garden, and stake out in September per diagram, dig out to a foot deep, lay it on each side in the pathway, then wheel in 3 inches of good manure, fork this in about another foot, and if dug over deeply two or three times so much the better; on the top of this place a fair coating of rich soil and soot, and over this 3 inches of soil from out of the alley, then place one plant to every 9 inches, spreading the roots well out, covering them over with the finest soil, free from stones. For the top covering have 6 inches of light friable or even sandy soil. The first year make one cutting only, if the plants are three years old, the following winter add more fine soil, so that there is something like 9 inches of earth above the crown of the plants. Asparagus made in this way with a good coating of manure and a fair amount of salt and soot every other year cannot fail to give abundance of this excellent vegetable until the peas make their appearance.

	Per oz.—s. d.
Monover's Colossal —Early, and very large ...	0 4
Plant —Good, for general use ...	0 4
Cannells' Exhibition —This cannot be surpassed; of large size and equally as well adapted for exhibition as for general market garden purposes; delicate flavour, wonderfully productive ...	1 0

For plants, see page 20.

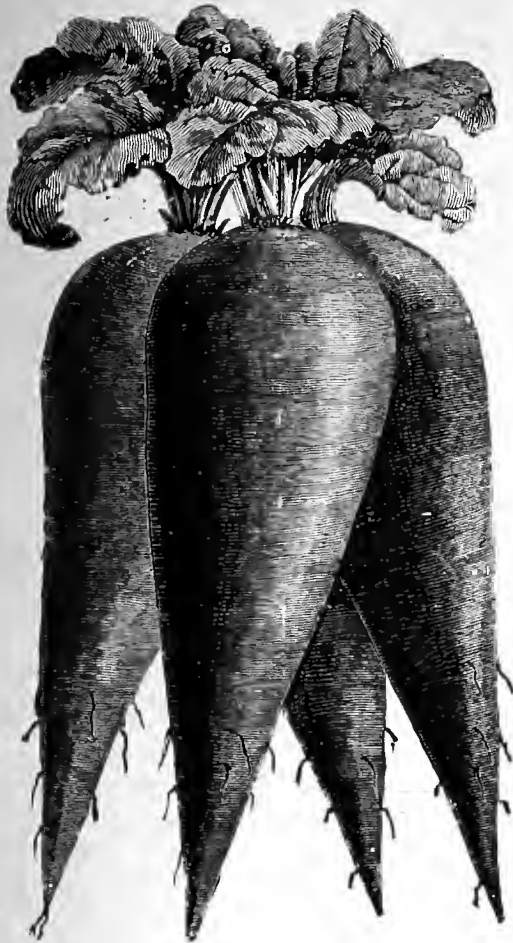

Aspergine—See Egg Plant.

Carbe de Capucin—See Chicory.

CANNELLS' SEED GUIDE, 1910.

BEET.

BEET, CANNELLS' BEST OF ALL.

CULTURE.—Sow the end of April on ground that has been deeply dug and well manured the previous year. At the time of sowing the ground should be again deeply dug, and the seeds sown in rows a foot apart. It may be sown in drills drawn by a hoe, or by dibbling a few seeds in holes an inch deep and a foot apart in the rows; thin out, when the plants are about 2 inches high, to a foot apart where in drills, and where dibbled in holes draw out all except one.

Dark-leaved Globe—Has not only a dark leaf like the best decorative strains, but is equal in the colour of the flesh to any fine selection of the Dell's type Per oz.—s. d. 0 6 per pkt., 1s. 6d. —

Cannells' Best of All—Medium-sized root of a beautiful rich deep blood colour, fine shape, and clean growing. Its handsome leaves render it a very effective variety for the flower garden and exhibition table per pkt., 3d. and 6d. 1 0

Cannells' Rotunda—Turnip shaped, flesh dark crimson colour, useful for Summer salads 0 6

Dell's Crimson—Leaves of a dark bronze colour; very ornamental for the flower garden 0 6

Nutting's Dark Red—A splendid variety for general purposes ... 0 6

Ornamental Chilian (Dracæna Leaved)—Non-edible; for decorating shrubberies, and the flower garden, per pkt. 3d. and 6d. 1 0

Spinach, or Perpetual Beet—Both stalks and leaves of this variety are used—the former should be served up as Asparagus, and the latter makes an excellent substitute for Spinach ... 0 6

All other varieties can be supplied.

BORECOLE, or KALE.

CURLY GREENS OR SCOTCH KALE.

CULTURE.—For Spring use sow about the middle of March or early in April, and in August for Autumn and Winter use, broadcast over a well-prepared bed, and cover lightly with fine soil. When the plants are large enough to be handled, prick out on another prepared bed, about 6 inches apart, and well water them. When strong enough, to be planted out in their permanent quarters about 2 feet 6 inches apart each way.

Cannells' Winter Gem—Producing a quantity of side sprouts that continue in good condition for a considerable time without showing signs of injury by the most severe weather; delicious and tender Per oz.—s. d. 0 6 per pkt., 1s. and 1s. 6d. —

Asparagus—A useful kind; very delicious and hardy ... 0 6

Improved Cottager's—Very hardy, and produces a large crop ... 0 6

Dwarf Green Curled (German Greens)—For early and general cultivation Per oz.—s. d. 0 6

Tall Green Curled—A useful variety 0 6

Drumhead Kale—The outer leaves resemble the Kale, and the heart that of a Cabbage. Dwarf in habit, perfectly hardy, and a most useful winter vegetable per pkt., 6d. —

Thousand Headed—Withstands the most severe weather; it is beautiful and tender when cooked 0 6

Mr. E. S., Higheombe Edge, Surrey.
Indeed, it would be a rarity if vegetables and flowers from Cannells' seeds did not stand first and foremost. I am glad to say they brought me thirteen firsts and also a special for the best exhibit. This should induce growers to patronise them.

Mr. J. S., Chesterfield.
I have grown your golden seed by the side of seed supplied by a Lincolnshire firm, and the comparison is marvellous. I feel quite sure that once you get a customer you never lose them, because no seeds could possibly be better.

BRUSSELS SPROUTS.

CAMBRIDGE CHAMPION.

CULTURE.—Sow the seed between the beginning of March and end of April—the earlier the better—in drills, on a well-prepared bed, and cover thinly with fine soil. When the plants are 2 or 3 inches high draw out the strongest and transplant into another bed, 6 inches apart. In May or June plant 2 feet apart in the rows and 1½ feet between the plants in the rows. Ground should be prepared early, so as to allow the soil to become firm.

Per oz.
s. d.

Cannells' Matchless—An excellent variety, most reliable and useful kind, and from the seed we are sending out, saved from our improved stock, the one indispensable variety for keen competitive purposes, and also for general use and market garden requirements per pkt., 3d. and 6d. 1 0

Cambridge Champion—The sprouts are firm and of excellent flavour, keeps well and one of the best for the table, per pkt., 6d. and 1s. —

Algburth—One of the hardiest and most productive varieties in cultivation per pkt., 4d. 0 8

Srymger's Giant—A superior and useful variety; compact sprouts of delicate flavour 0 6

Dalkeith—Robust habit, medium height, richly flavoured sprouts; a good market gardener's variety 0 8

Other varieties can be supplied. For plants, see page 19.

BROCCOLI.

CULTURE.—Early sowings may be made in February, under glass, followed by sowings in the open ground, middle of April and second week in May, for successive crops. When the plants are large enough, prick out into a bed 6 inches apart, and after they have acquired strength, transplant to a piece of ground that has been previously well dug and sooted, in rows 2½ feet apart and 2 feet distant from each other. As the plants advance in growth draw the soil around the stems, and give liquid manure occasionally. We strongly recommend a sprinkling of nitrate of soda which will be found to work wonders. It is advisable to cut the heads as soon as they attain medium size.

SECTION I.—For Cutting from September to November.

	Per pkt.	Per oz.
	s. d.	s. d.

See Plants, page 19.

CANNELLS' SEED GUIDE, 1910.

CAPSICUM AND CHILI.

USE.—The pods are used for pickling, and when ripe, ground to make Cayenne pepper, and also as ornamental pot plants in greenhouse.

CULTURE.—Sow in the end of March or the beginning of April in pans, and place in a hot-bed. When the plants are in seed leaf, thin to 4 inches apart; those drawn out may again be transplanted into pots or pans. Continue them in the hot-bed, and give air freely. In May harden them off by gradually exposing to the open air. Early in June transplant, where they are to remain, in a sheltered position, under a south wall.

Child's Celestial Pepper—Creamy-yellow, changing to an intense vivid scarlet. Sharp flavour, and superior for any of the uses to which a pepper can be put. Per pkt., 6d.

Chili
Golden Queen—A very ornamental variety
Large Bell, or Bull's Nose—Large, early; mild flavour; colour glossy red	All at 3d. & 6d. per packet.
Mixed Varieties
Pepper, Elephant's Trunk (<i>capsicum annum proboscideum</i>)—Long glossy scarlet fruits

Other varieties can be supplied.

CARDOON.

CULTURE.—Sow in April, and grow in trenches in the same way as Celery, allowing a little more room in between the plants. Large Spanish, cultivated for the mid-rib of the leaves, blanched like Celery; used for soups, stewing, and salads per oz. 10d.

COUVE TRONCHUDA, or PORTUGAL CABBAGE.

BRAGANZA MARROW, SEA-KALE CABBAGE.

Should be sown in a little heat during February or March, grown on in a frame, gradually hardened off, and transplanted in May into rows of 2 feet apart, or can be sown in July, keeping the plants in a frame during the winter, and plant out in May, it will then be ready for use in summer; it appreciates a good rich soil. The heart can be used in the same way as the cabbage, and the thick fleshy mid-ribs of the largest leaves can be cooked like Sea-Kale, for which it is a very good substitute, and makes an excellent dish. Per pkt., 3d. and 6d.; per oz., 10d.

CAULIFLOWER.

CULTURE.—Sow end of January or early in February in a frame on a slight heat, or in a house, so that the plants may be forwarded and hardened off by April, when a sowing may be made outdoors. From this sowing heads will be produced in July and August. To stand the Winter, seeds should be sown about the third week in August. *Cannells' First-to-Cut*, *Early London*, and *Early Dwarf Erfurt* are reliable sorts. Select a sunny, well-drained spot for the seed bed, well work, and if at all heavy add a good dressing of fine sandy soil or old potting compost, after which the seed may be sown thinly and broadcast, and covered with fine soil. When the seedlings appear, apply an occasional dusting of soot and lime as a preventive against slugs. The strongest plants, when ready, should be dibbled out rather thickly in hand-lights and cold frames, and the remainder left in the seed bed where they will frequently survive an ordinary Winter. Finally, plant out in Spring.

	Per pkt.	Per oz.		Per pkt.	Per oz.
Cannells' First-to-cut —It still maintains its character as being the earliest of all; dwarf, medium-sized heads, colour good and of a delicious flavour; a gem In sealed packets, 1s. & 1 6	s. d.	s. d.	Late Metropole —Of robust habit, enormous size, and at the same time of excellent shape and great tenderness and delicate flavour. The <i>Metropole</i> requires a strong soil, and on account of the weight of the heads it is often necessary to earth up the plants	s. d.	s. d.
Cannells' Early Dwarf Mammoth —Fine as a forcing variety, or for the early crop outdoor; close, solid, and pure white heads	6d. & 1 0	1 6	Early London —Compact; very early	0 8	1 4
Eclipse —A favourite in every garden where it has been cultivated. Can be had from August to Christmas	6d. & 1 0	1 9	Early Snowball —Dwarf habit, with heads of medium size, very compact, and of good flavour	1 6	—
Cannells' Autumn Giant —Distinct. The heads are beautifully white, firm, and compact, and remain longer fit for use than any other kind	6d. & 1 0	1 6	Early Dwarf Erfurt —The best of the earliest sorts. By occasional sowing a supply can be kept up until Christmas	6d. & 1 0	1 9
			Walcheren —Good for general crop	4d. & 0 8	1 4

For Plants, see page 19.

CELERY.

CULTURE.—In February sow in heat; March and April in open border. Plant in April, May, and July, from 2 feet 9 inches to 3 feet between the trenches. A coating of mineral manure to the bottom of the trenches with rotten dung from an old hot-bed, and well water in dry weather. However large Celery may be, it is of little value if disfigured by the ravages of garden pests. It is of the utmost importance that soot, burnt ashes, or even fine soil is banked closely round the stems, too much soot can hardly be used, both to keep away the celery-fly that works its way in and deposits its eggs between the two skins of the leaves, and also to keep slugs from injuring it.

RED VARIETIES.

Eynsford Red —A grand acquisition for exhibition and table use. Continues quite constant; good strong habit, the stalks are large, thick, and of excellent nutty flavour	Per pkt. s. d.
Early Rose —The stems solid and crisp, and of a fine walnut flavour. An early variety, but the heads remain a long time fit for use; white heart, and stems delicately shaded with pale rose or flesh colour	6d. & 1 0
Selected Standard Bearer —A splendid red variety, of sturdy compact habit, robust growth, and medium height. It grows to a heavy weight, is of superior quality, crisp, juicy, and of a fine nutty flavour	6d. & 1 0
Leicester Red —Exceedingly crisp; fine flavour	0 6
Sulham Prize Pink —One of the best pink varieties, close habit, large heart, solid, crisp, fine walnut flavour	0 6

WHITE VARIETIES.

Cannells' Heartwell White —Unequalled for crispness and sweet nutty flavour; dwarf habit of growth, and very solid heads	Per pkt.—s. d.
Sandringham White —A splendid variety; large, but not coarse; solid, crisp, and juicy	6d. & 1 0
Invinible White —A vigorous growing sort, very crisp, solid, and well-flavoured. It can be grown for exhibition to an enormous size without running to seed	6d. & 1 0
Celeriac, or Turnip-rooted Celery —Chiefly used in soups	3d. & 0 6
Celery Seed —For flavouring soups	per oz. 0 3

Other varieties can be supplied.

For Plants, see page 19.

CUCUMBER (Frame.)

CULTURE.—Nothing is so desirable as good Cucumbers, but attention is required if good fruit is to be obtained. The seeds may be sown in January or February in pots or pans. The temperature of the seed-bed should range from 70 to 80 degrees, never sinking below 60 degrees. Outdoor or Ridge Cucumber should be sown in pots during April, and transplanted in May to a spot previously prepared with well-rotten manure.

CANNELLS' IMPROVED
TELEGRAPH.

	Per pkt.—s.	d.
Cannells' Improved Telegraph — Flavour excellent, deep green skin, and the fruit of good length. We have saved a splendid sample of seed, and can confidently recommend it to our customers as a grand re-selection from the old far-famed variety ...	1s. and	2 0
Cannells' Favourite —A first-class variety, attains a good length	1 0
Blair's Prolific —A handsome variety of a deep green colour, with no neck, and grows longer than <i>Lockie's Perfection</i> ; valuable for either Summer or Winter cultivation	1 0
Every Day .—It is dark skinned, very handsome in shape, most prolific, and of splendid flavour. First-Class Certificate, R.H.S.	1 0
Lockie's Perfection .—A splendid variety, its chief features being the finest in the <i>Telegraph</i> family with black spine; very free	6d. and 1 0

	Per pkt.—s.	d.
Lord Roberts —A handsome variety of a dark green colour, with very little neck, highly prolific, and recommended for either Winter or Summer use	1 6
Mortimer's Bounteous —Dark green, very tender and delicate in flavour, fine shape, prolific; grand for exhibition and general purposes. Award of Merit. In raiser's sealed packets	1 0
Rochford's Market —Medium length, colour rich green, spines more conspicuous than in the old <i>Telegraph</i> ; a fine market variety	1 0
Sensation —Smooth and perfect in outline, with a scarcity of neck; handsome dark green colour; a free cropper, and of excellent flavour. First-Class Certificate, R.H.S.	1 6
Tender and True —Fine variety for exhibition, handsome fruit of a dark green colour, first-class quality	1 0

Other varieties can be supplied.

For Plants, see page 19.

CUCUMBER (Ridge or Outdoor).

	Per pkt.—s.	d.
Selected Bedfordshire Prize —A superior variety of outdoor Cucumber, fine flavour and appearance; a prolific bearer; one of the most useful, and highly recommended	3d. and 0 6

	Per pkt.—s.	d.
Uncum —Very hardy and withstands the bad effects of wet and cold weather better than any other; it gives a large crop of long high fruits and of the finest flavour	6d. & 1 0
Short Prickly	3d. & 6d. per packet

Short Green Gherkin—The one most used for pickling, fruit being only from 3 to 4 inches long ... 3d. & 6d. per packet.
Long Prickly ... 3d. & 6d. per packet.

CHICORY OR SUCCORY.

CULTURE.—Sow in April in rows a foot apart, thin out to 6 inches in the row. In autumn store the roots in dry sand and when required at intervals should be placed in soil in a dark place and kept moist. It will give leaves in a few days equal to Endive, and cook the same as Sea Kale.

	Per oz.—s.	d.
Common (<i>Barbe de Capucin</i>)	0 6
Witloef (<i>Brussels Chicory</i>)—One of the best winter salads grown	0 6

CORN SALAD or LAMB'S LETTUCE.

Very useful during Winter and Spring for Salads, and especially when outdoor Lettuces are about finished, for which it is an agreeable substitute and change. Sowings can be made in February, April, August, and September, in shallow drills, 9 inches apart, and thin out to 6 inches apart in the rows. The soil should have been well tilled. It rather enjoys an open position.

	Per oz.—s.	d.
Italian —Broad-leaved	0 6

CRESS.

PEPPER GRASS.

CULTURE.—Plain and Curled Cress should be sown weekly during the whole year, if a regular supply is required, the state of the weather regulating the method of sowing. As a rule, from November to March, a gentle hot-bed is the best. Australian Cress sown in the open border during March and April, and in a cool and shady place in May, will produce crops in succession; and if sown under a north wall in September and October with a little protection, will afford a supply during Winter and Spring. Water-cress may be easily grown in a damp and shady place, and on no account must suffer from drought. Sow in March and April.

Australian or Golden Salad —Very tender; mild flavour ...	—	—	0 6
Water-cress	per pkt., 6d.

I have exhibited flowers and vegetables from your seeds at three local shows. From 23 entries I have won 22 prizes (13 firsts). Lots ask whose seeds I have to thank for all these successes.

I am glad to say that since I have been getting seeds from you we have had abundant supplies of all sorts of vegetables, and our consumption here is no small matter.

I have always been well served with seed by you for over 30 years.

Mr. W. M., Boscawen, Cornwall.

J. F. B.

Mr. R. B., Leigh.

DANDELION.

CULTURE.—Useful as a salad when blanched. Seed to be sown in Spring; the roots to be lifted and stored in November, and force as required, somewhat in the same manner as Sea Kale.

Improved large thick-leaved, 6d. and 1s. per packet.

EGG PLANT.

Handsome fruit-bearing annuals, fine for table decoration. Sow in heat in March, pot off in rich soil; the chief thing is to keep them thoroughly free from insects. Grow on in same way as Capsicums.

The Purple is the best for cooking, and the other varieties make a nice contrast in garnishing and salads. 2 to 3 ft.

Cardinal—New medium-sized oval shaped fruits, of a bright scarlet colour; ripens much earlier than other sorts; highly decorative.

Per packet, 3d. and 6d.

Black Pekin.
Scarlet.

White.
New York Purple.
Each, per packet, 3d.

Mixed.

ENDIVE.

CULTURE.—For Autumn use sow end of April or during May, on prepared soil, in drills a foot apart, and thin out to 6 inches from plant to plant; water in dry weather. If a Winter and early Spring supply is needed, sow in July and August, and transplant to frames, or a sheltered position, secure from frost.

Per oz.—s. d.

Cannells' Green Curled—The one mostly cultivated for general crop; very crisp and hardy ... 0 6

Cannells' Moss Curled—Beautifully curled, like Moss ... 0 8

Green Batavian—Large and fine ... 0 8

Improved Round-leaved Batavian—Very compact; forms a nice heart, blanches easily ... 0 8

White Curled—Very tender when young ... 0 9

HERBS, GARNISHING PLANTS, &c.

3d. and 6d. per packet, except where priced by the ounce.

CULTURE.—Sow in pans in a cold frame about first or second week in March; afterwards transplant into prepared beds, or the seeds can be sown the first week in April on warm border or outdoors.

Angelica—For flavouring. Leaf stalks can be blanched and eaten as Celery, or preserved with sugar.

Anise—For seasoning and garnishing.

Balm—Aromatic plant. May be used in salads or making Balm Tea or Wine.

Basil, Sweet } Excellent for flavouring soups and salads.
Bush }

Borage—Used for Summer drinks; excellent for bees.

Burnet—The young leaves have a fine flavour.

Caraway—Seeds used in confectionery, lower leaves can be put in soups.

Celery Seed—For soups. Per oz., 3d.

Chervil, Curled—For salads.

Clary (*Salvia selarea*)—For seasoning and soups.

Corn Salad or Lamb's Lettuce—A hardy, useful salad. Per oz., 6d.

Dill—Leaves used in pickles and sauces.

Fennel—For garnishing and fish sauce.

Horseradish—For the cure of asthma; also for seasoning.

Horseradish—See page 20.

Hyssop—Leaves and shoots used for pot-herbs, also medicinally, aromatic.

Ice Plant—Fine for garnishing.

Indian Corn—See Maize.

Kale—See Borecole.

Lamb's Lettuce—See Corn Salad.

Lavender—Grown for its sweet-scented flowers. Occasionally used in sauces.

GARLIC. (See page 20.) GOURD, PUMPKIN, or SQUASH.

CULTURE.—Same as Vegetable Marrow. Some of the ornamental varieties can be trained over arches, &c., in the garden.

Per pkt.—s. d.

Fordhook Squash—Freely fruiting, pale yellow ... 0 6

Hubbard Squash—Iron olive-green, useful ... 0 6

Mammoth Whale Squash—Olive green, shaded grey ... 0 6

Cucumis Erinaceus (*Hedgehog Gourd*)—Bristly Green ... 0 6

Grossularia (*Gooseberry Gourd*)—Green, striped grey, hairy ... 0 6

Cucurbita Maliformis (*Apple Gourd*) ... 0 6

Depressa Striata—Olive green, striped with silvery hands and marbled with grey; can be sliced up and used in salads ... 0 6

Lagenaria (*Clava Herculis*) (*Hercules Club*)—Nearly 3 ft. long ... 0 6

Lagenaria (*Bottle Gourd*)—Creamy white ... 0 6

Mammoth White, Bush Scalloped (*Patty Pan*)—Of remarkable growth ... 0 6

Turk's Cap (*Cottage Loaf*) ... 0 6

Cannells' Hundredweight, or Mammoth—The largest in cultivation, often attaining an incredible weight ... 0 6

Ohio Squash—One of the most useful and enjoyable both for Autumn and Winter use. Useful for soups also ... 0 6

Ornamental Varieties—Mixed. Many curious and pretty kinds ... all at 0 3

A collection of 12 varieties, 2s. 6d.

LEEK.

CULTURE.—For an early crop sow in a pot, pan, or box early in February, and place in a frame or a slightly-heated place, and when the plants are 3 or 4 inches high, prick out in a sheltered position or frame in rich soil. Here they are to remain until good-sized plants are formed, and then transplanted to their permanent quarters. Leeks of very fine quality, and good enough for ordinary use, may be obtained from seed sown the first week in March, broadcast, on a warm border, and cover lightly with mellow soil. Transplant, when large enough, in rows 18 inches apart, and about 8 inches in the row. Prepare trenches and earth up in the same way as Celery. Use mineral manure.

CANNELLS' MAMMOTH—A superior kind, very hardy, blanches well, and grows to a large size; a splendid exhibition variety ... 3d. and 6d. per pkt., 1s. per oz.

Per pkt. Per oz.

Cannells' Champion—This Leek has gained many honours ... 6d. & 1 0 1 6

Cannells' Lyon (Re-selected)—A thoroughly distinct variety, s. d. s. d. matures early, grows to a great size and weight without coarseness. The white part, when blanched, often exceeds 16 inches in length and 9 inches in circumference 6d. & 1 0 1 6

Glant Aytton Castle—A very large and fine variety 3d. & 0 6 1 0

Musellburgh—Large Scotch; finest stock ... — 0 9

Other varieties can be supplied. For Plants, see page 19.

CANNELLS' SEED GUIDE, 1910.

LETTUCE.

CULTURE.—Sow from the first week in March till September for succession. When 3 inches high, remove the strongest plants to prepared ground, and plant them in rows from 1 to 2 feet apart, according to size. For Spring use sow in Autumn, prick out in frames, and transplant early. After being planted they should never be allowed to suffer for the want of water. For very early use, sow a little under glass during February.

COS VARIETIES.

	Per pkt.	Per oz.
Cannells' Exhibition Giant Cos —Larger and finer in every way than the best types of Cos Lettuce ...	s. d. 3d. and 0 6	s. d. 1 0

MAIZE or INDIAN CORN.

This should be more generally grown as a vegetable in this country. As its cultivation is not difficult, and it is not necessary for the seed or cobs to become hard before gathering, they should be made use of when in a green state, or just when passing out of the milky state, and only directly they are required for use. Boiled and served with a suitable sauce, they are quite enjoyable. Sow in April in a gentle heat, and when sufficiently hardened and all danger of frost is over, plant out in a warm position about 18 inches to 2 feet apart.

Cannells' Early Dwarf Sugar.

Adam's Early.

Early Minnesota.

Each, per pkt., 3d. and 6d.

Other varieties can be supplied.

MELON.

CULTURE.—Similar to that of the Cucumber, but requiring several degrees more of heat, which must be maintained with regularity. A quick growth should be encouraged during the earlier stages, and when about 1 foot or so high the tips should be pinched out, causing them to come stronger, and the fruit sets more freely. As a rule they are in perfection just before the stems come away easily from the fruit. The soil should be kept firm and solid throughout the growth; they prefer a rich fibrous loam.

	Per pkt.—s. d.
Blenheim Orange —Scarlet flesh, delicious flavour ...	1 0
Diamond Jubilee —Sets freely; oblong in shape, beautifully netted, a pretty golden yellow when ripe. Flesh greenish white, flavour excellent; acquisition for early crops ...	1 0
Earl's Favourite, The —Green fleshed, delicious flavour; a strong grower and free setter; does quite as well in cool frames as in the houses ...	1 0
Gulton Scarlet —Medium size, beautifully netted, delicious flavour. A valuable addition to the scarlet flesh varieties ...	1 0
Hero of Lockinge —Handsome fruit, skin rich golden, regularly netted with white. Flesh almost white, exquisite flavour; a popular variety for exhibition, and useful for growing in frames ...	6d. & 1 0
Invincible —Globular form, orange red skin evenly netted, thick bright scarlet flesh, grand flavour, sets freely, first class for frame culture ...	1 0

	Per pkt.—s. d.
Monro's Little Heath —Easily cultivated, very prolific, and one of the hardiest. The flesh is scarlet ...	6d. & 1 0
Queen of the West —Rich yellow skin, beautifully netted; greenish-white flesh ...	1 6
Read's Scarlet Flesh —One of the most exquisite flavoured Melons in cultivation, beautifully netted ...	1 0
Royal Sovereign —Free setting nature, beautiful golden yellow, slightly netted, flesh white, faintly tinged green; very deep; rind very thin. Award of Merit, R.H.S. ...	1 0
Taunton Hero —Round in shape, lightly netted, and bright golden yellow in colour. The flesh is white, deep, melting ...	1 0

Other varieties can be supplied.

For Plants, see page 19.

MERCURY. (CHENOPODIUM BONUS HENRICUS.)

A perennial vegetable much grown in Lincolnshire, and commonly known by the name of *Good King Henry*. The shoots when boiled are tender and much like Asparagus, and the leaves are very useful in place of Spinach. Seeds may be sown in March in drills a foot apart, and then thin out to 9 inches in the rows. It is very productive, a small bed therefore generally suffices for ordinary purposes.

	s. d.
Good King Henry ...	per pkt., 6d. and 1 0

MUSHROOM.

Our MUSHROOM SPAWN is fresh and of the Best Quality.

A REDUCED PRICE FOR LARGE QUANTITIES.

Having every facility, and to be quite sure that nothing but the best shall come from us, we collect samples from all reliable sources where manufactured, immediately test which is the best, and purchase accordingly and have specially prepared for us; consequently, all our customers succeed, most of them far above their expectations. At this moment we have a splendid fresh stock, and beyond all question the finest ever offered both for outside or indoor cultivation. Per brick, 4d., postage 4d.; per peck, 1s. 4d., postage 7d.; per bushel of 16 cakes, 5s.

A Practical Treatise on the Cultivation of Mushrooms, by J. F. Barter, price 1s., post free 1s. 2d.
By using Cannells' Perfect Mushroom Spawn they can be had all the year round.

MUSTARD. CRUCIFERÆ.

CULTURE.—Sow every fortnight for succession in boxes, in heat when too cold out of doors. On account of making such rapid growth, should be sown about a day or so later than Cress, when they are required to come in together for cutting.

Cannells' Eynsford White—A splendid, carefully-selected, and improved form of the old variety, as generally grown for salads
Cheaper by the peck or bushel.
Chinese—Leaves and stems much larger than the common variety, black seeded per quart, 1s. 6d.; per pint, 9d.; 0 2
... .. 0 3

CANNELLS' PRIZE MEDAL ONIONS.

AWARDED MANY GOLD AND SILVER MEDALS.

CULTURE.—The ground should be double dug in October or early in November. The ground can then be left in its rough state until early in January, when a good dressing of soot may be spread over the surface, which is not only a preventive for the maggot, but a valuable stimulant for the Onion throughout its different stages of growth. Nothing more should be done until the end of February or March, when (weather permitting) the beds should be pointed over, well raked, and rolled or trodden down firm, and the seed drilled in rows 1 foot apart, which leaves ample room for a draw hoe, which cannot well be used too often if care be exercised to avoid any injury to the tops. As soon as the Onions are up and well established thin out to 9 inches apart, and during an early stage of their growth a liberal top-dressing of spent mushroom bed manure would be beneficial in keeping the ground moist and cool in hot, dry seasons, and saving a considerable labour in watering. When they are in full growth a dressing of our "Real Manure," 2 ounces to the yard, will do wonders for them, especially if well watered in, should the weather be dry. Soot sown broadcast in showery weather will help to keep down the mildew and also encourage growth. For what are termed Tripoli or Winter Onions, sow early in August and transplant the following Spring. Onions may be grown on the same piece of land for years if good tillage is kept up every season. By sowing the Tripoli or Autumn Onions early in August, and transplanting the seedlings in due course, followed with a sowing, weather permitting, of Early Eight Weeks in February, and then again with the Spring varieties, it is possible by this method to have Onions throughout the year.

SEED OF SPECIALLY SELECTED EXHIBITION VARIETIES.

Seeds saved from the finest Exhibition and most typical Bulbs and True Pedigree Stocks.

THE GIANT.

The Giant—Of beautiful globe shape, and larger than either *Ailsa Craig* or *Excelsior*; very heavy and solid, of excellent flavour, and a first-class keeper; pale yellow in colour... .. 2 6
Cannells' Ailsa Craig—One of the largest and most beautiful kinds; bulbs vary from almost a globe to a deep flat oval shape, are of a pale straw colour per oz. 2s. 1 0
Cocoa-Nut—Skin is very delicate pale straw colour, flesh white, and very mild; most useful for exhibiting in collections; very fine 1s. & 1 6
Improved Wroxton—A valuable Onion, the mildest flavoured and best keeper in cultivation. It may be grown to a large size; delicate light brown straw colour. It is an egg-shaped type, and quite distinct 6d. & 1 0
Cranston's Excelsior—Very small neck, globe-shaped; pale straw; grand for competition 6d. & 1 0
Reading Improved—Beautiful shape, mild flavour; keeps good for a long time; useful for the exhibition stage 6d. & 1 0
Cannells' Globe—Very globular, and of a deep rich straw colour; very handsome and quite hardy; attains to a large size and occasionally weighing 1½ lbs. 1 6
Plants of Exhibition Varieties raised under glass in the Spring and specially prepared in pots of all the finest kinds. See page 19.

GOOD KITCHEN AND GENERAL MAIN CROP VARIETIES.

Bedfordshire Champion —Globe shaped, skin brown, heavy cropper and a good keeper	Per oz.—s. d.	Golden Ball —The finest Globe Onion in cultivation, a very heavy cropper, growing to a large size, with small neck, and bulb a beautiful globe shape. It is an excellent keeper, capital for exhibition	Per oz.—s. d.
Danvers Yellow Globe —An excellent large sort, and keeps well; one of the best	0 8	Improved Banbury —A fine shape, with a bright yellow skin, suitable for the exhibition table	1 0
Early Eight Weeks —Coming to maturity in about eight weeks. Invaluable where Onions are required early in the Summer; very useful for pickling, and of mild flavour	0 6	Rousham Park Hero —Splendid variety of the White Spanish type	0 8
	0 8		0 9

	Per oz.—s. d.
Nuneham Park—Fine for competition; straw coloured ...	0 8
White Spanish, or Portugal—One of the best for main crop ...	0 6
Blood Red—Strong flavoured, keeps well ...	0 8
Brown Spanish—Large cropper; good keeper ...	0 6
Deptford or Strasburg—A good keeper ...	0 6
Giant Zittau Yellow—This is a capital keeping variety, if the bnlbs are allowed to remain in the ground until thoroughly matured before being disturbed ...	0 8

	Per oz.—s. d.
James' Long Keeping—Keeps longer than any other sort ...	0 8
The Queen—A silver-skinned variety, remarkable for its quickness of growth. If sown in March will produce full-grown bnlbs early in the Summer; most suitable for pickling ...	0 8
Welsh or Ciboule, or Perennial Tree Onion—Comes up year after year without any protection; very rapid in growth, tender and sweet ...	0 6

VARIETIES FOR AUTUMN SOWING.

TRIPOLI, OR ITALIAN SORTS.

	Per oz.—s. d.
Cannells' Improved Giant Rocca—Globular, very hardy; very large; mild flavour ...	0 8
Giant Blood Red Rocca.—Useful for exhibition; large and fine ...	0 8
Giant Lemon Rocca—Attains a large size; good keeper; mild flavour; grand for exhibition, one of the best for autumn sowing...	0 10

	Per oz.—s. d.
White Italian—One of the earliest and finest white flat onions; well adapted for exhibiting during July and August ...	0 8
White Lisbon—Of medium size; esteemed for its mild flavour ...	0 6
Potato-Onion—See page 20.	

For Plants, see page 19.

Other varieties can be supplied.

PARSLEY.

CULTURE.—Should the weather be dry, sow early in February; if not, defer till middle of March. Sow again in May, and also July, for furnishing plants to stand over Winter. Parsley seed is rather longer than most seeds in germinating, and should be watered in dry weather if necessary. The secret of having it good all the year is to sow in good soil, 16 inches from plant to plant.

Cannells' Eynsford Beauty—A beautiful kind. Where a variety is required for garnishing and exhibition purposes, this will meet all requirements. Hardy, and well adapted for pot culture; compact habit. Per pkt., 3d. and 6d.; per oz., 1s.

Cannells' Beauty of the Parterre—Handsome and highly decorative. Should be thinned out to at least 12 inches apart. Per pkt., 3d. and 6d.; per oz., 9d.

	Per oz.—s. d.
Selected Fernleaf—Invaluable as a garnishing plant and for table decoration; one of the finest in cultivation...	0 6
Improved Moss Curled—A beautiful variety ...	0 6
Covent Garden Garnishing—One of the best curled varieties ...	0 6
Myatt's Garnishing—A splendid variety; very double ...	0 4

PARSNIP.

CULTURE.—Sow about the second week in February, or first in March, or as early as the ground is in a fit state to receive the seed, choosing a light deep-trenched soil if possible; and if required for exhibition, make a hole 3 feet deep with a crowbar, push this round so that the hole is largest at the top, fill with fine soil, and finish off with dibbling in three seeds. After germinating leave the strongest seedling, assist them when in full growth, make four holes a foot deep in the soil and about 5 inches away from the plant, which can be occasionally filled up with liquid manure. They should be allowed to remain in the ground as long as the weather permits, and when lifted should be carefully placed in sand.

	Per oz.—s. d.
Cannells' First Prize—A grand variety for exhibition; skin smooth and well blanched; of splendid shape, and tapering off with perfect regularity ...	0 8
Cannells' Student—A first-class variety for the garden ...	0 6

	Per oz.—s. d.
Cannells' Hollow Crown—A selected stock producing long, clean, and smooth roots, free from side shoots; very tender ...	0 4
True Jersey Marrow—Extra large ...	0 4

Our Stock is grown from annually selected roots only.

KITCHEN AND EXHIBITION SEED POTATOES.

SPECIALLY GROWN AND SELECTED FOR SEED, AND TRUE TO NAME.

Those marked with a * are good Exhibition varieties.

It is absolutely necessary that full Rail Address should accompany all orders for Potatoes.

We grow, at our farm at Eynsford, many acres all for seed on calcareous soil, and as change of seed off different soil is so essential for heavy and healthy crops, our seed potatoes will be found to give undoubted satisfaction both for exhibition and table purposes. Great attention and care is bestowed upon each variety to keep them perfectly true. All samples are hand-picked by experienced men who are well acquainted with the respective sorts.

CULTURE.—Consider the condition of the soil—if rich, pulverize it by digging two, three, or four times. Plant early, before the strong eyes at the principal end start growing. Do everything possible so that the foliage is in no way injured. Take up early. Never clamp up tight until frosts set in—this prevents premature growth. Peel with a proper peeling knife. Do this every evening, and let them lie in water all night, and you certainly cannot fail to have mealy, beautiful eating Potatoes when cooked.

Abbreviations:—w.r., White Round; w.k., White Kidney; c.r., Coloured Round; c.k., Coloured Kidney.

We should be pleased to supply Collections of 12, 18, or 24 Varieties, consisting of the finest Exhibition kinds or for Table use. On application, Special Quotations per ton will be forwarded. Our Prices are subject to alteration after the middle of March. Public Institutions, Hospitals, &c., supplied on Special Terms. Large or small quantities forwarded. Send on list of kinds and quantities required.

The Carriage of Potatoes, Mushroom Spawn, &c., as part of a general order or alone, will be prepaid to any Station in England when the total value is not less than 20s., and to Ireland or Scotland when the total value is not less than 40s.

Awarded Silver Medal for Potatoes (National Potato Society).

RADISH.

SAVED FROM TRANSPLANTED AND SELECTED ROOTS ONLY.

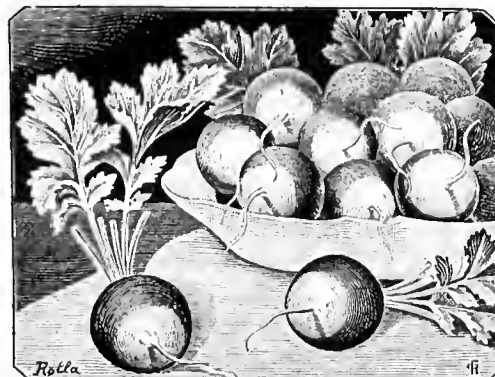

CULTURE.—To have early, sow in frames near the glass in January; in the open ground in February, and every fortnight till August. To obtain crisp, sweet-eating radishes they must be grown quickly. The turnip-shaped varieties are the best for winter culture.

	Per oz.—s.	d.
Earliest Scarlet Short-top Turnip—Very useful for early forcing; rapid growth	per pint, 2s. 6d.	0 6
Earliest White Short-top Turnip—Equally as useful for early season work; crisp and sweet	per pint, 2s. 6d.	0 6
Golden Oval—Colour is quite distinct. It has a great advantage of being able to withstand hot dry weather better than most sorts	per pint, 2s. 6d.	0 6
Cannells' Selected French Breakfast—For early forcing, very much liked in Paris. It is of an oval form; scarlet, tipped with white	per pint, 2s.	0 4
Improved Olive-shaped Scarlet—Quick growing, mild, and sweet	per quart, 3s. 6d.; per pint, 2s.	0 4
Selected Icicle—Quite distinct from any other kind. It is equal to other sorts in earliness and good flavour, while regarding its beautiful white skin and productiveness it is unrivalled		0 6
Olive-shaped White—Similar to the scarlet except in colour		0 4
Mixed Olive-shaped	per pint, 2s.	0 4
Mixed Turnip	per quart, 2s. 9d.; „ 1s. 6d.	0 3
Red Turnip	„ 1s. 6d.	0 3
White Turnip	„ 1s. 6d.	0 3
Early Frame, Long Red—Very early; fine flavour	„ 1s. 9d.	0 3
Carmine, White Tips—Turnip of intense colour and small leaves	per pkt., 1s.	—

RADISH. For Winter Use.

China Rose, Winter—Sow in August for winter use. Oblong shape; of a bright rose colour; mild flavour... ..
per pint, 2s. 0 4

Other varieties can be supplied.

RADISH, CARMINE, WHITE TIP.

RHUBARB (Seed).

Seed of this family is preferable for sending abroad to that of the roots, or where a great quantity of plants are required in a short space of time for plantations and market purposes. Sow in March on a light rich soil in drills about 2 ft. apart; thin out, allowing the strongest plants to remain 10 to 16 inches apart.

Champagne. Early Red. Royal Albert. Victoria. Finest Mixed.
6d. per packet.

Rhubarb Roots, see page 20.

SALADS.

We supply seeds of plants generally used at various times of the year in the preparation of this now recognised necessity on the dining table. Descriptions will be found under the various headings—Barbe de Capucin, Celeriac, Chervil, Chicory, Chives, Corn Salad, Cress, Cucumber, Dandelion, Endive, Lettuce, Mustard, Nasturtium, Parslane, Radish, Rampion, Salsafy, Shallot, Tarragon, Tomato, Watercress, Witloef.

SALSIFY (Vegetable Oyster).

CULTURE.—Although Salsafy is not usually cultivated in small gardens, there is no reason why it should not be, as the roots form a valuable addition to the somewhat limited list of Winter vegetables. They are easily cooked, merely require scraping, steeping in vinegar and water, then boiled until tender, after which they may be served up with white sauce. The culture is quite as simple. Choose a piece of ground that has been well dug and manured previously, the surface also should be well pulverised. Sow the seed first week in April, in drills 15 inches apart and about 2 inches deep. As soon as the plants are large enough to handle, thin out to about 9 inches apart. Beyond this, except keeping clean from weeds, this is all the treatment required until growth is completed in autumn, when the roots may be lifted and stored in sand, or allowed to remain in the ground until required for use. Those left in the ground will produce flower stems in spring, and these if cooked when young make an excellent table vegetable.

Per oz.—s. d.
Cannells' Mammoth—Best quality 0 10

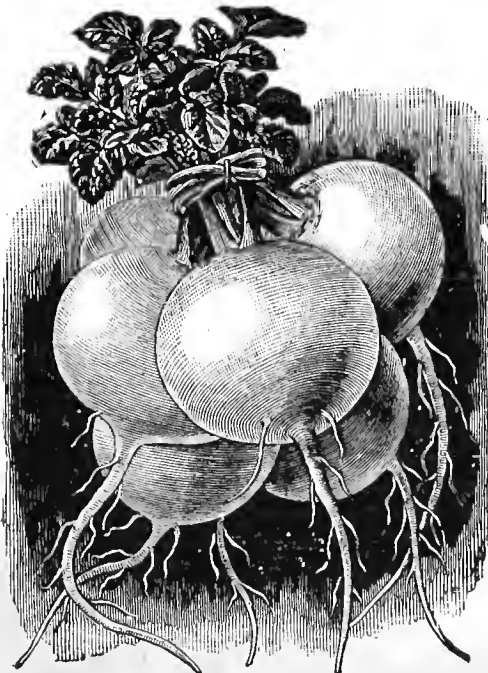

SCORZONERA.

CULTURE.—Same as for Salsafy. The roots are boiled or stewed in the same way as Parsnip. A delicious vegetable.

Cannells' Selected, 9d. per oz.

TURNIP (Garden).

CULTURE.—Sow in March, April, and once a month till the end of August. Sow *Six Weeks* and *Snowball* till May; they are the best for early use.
SEED SAVED FROM ONLY THE FINEST SHAPED AND MOST SOLID BULBS.

CANNELLS' EARLY SIX-WEEKS TURNIP.

SEA KALE (Seed).

CULTURE.—Sow in March or April in rows, about 15 inches apart, and keep the plants clear of weeds. Transplant to good, well trenched, and rich ground, in clumps of about four or five, and between each lot so planted leave a space of about 3 feet, so that any one can move between them during the growing season. 6d. per oz., 1s. 6d. per pint.

For Plants, see page 20.

SHALLOTS—See page 20.

SPINACH.

CULTURE.—Should the weather be favourable, a small sowing of the round variety may be made in January, another in February, and a larger one in March. Successive sowings may then be made every three weeks till the beginning of May, and afterwards weekly to the end of July. For Winter use, sow the prickly variety weekly during the first three weeks in August. The *New Zealand* should be sown in heat and transplanted, and be protected till the beginning of June, when it may be planted out without shelter.

Per oz.—s. d.

Cannells' Eynsford Favourite—A great advance on the old round form of Spinach, well adapted for Winter and Summer sowing per pint, 1s. 6d. 0 4
Prickly or Winter—For Winter use per qt., 1s. 9d.; per pt., 1s. 0 2
Round, or Summer—For Summer use " 1s. 9d.; " 1s. 0 2
New Zealand—Should be sown in February in heat and transplanted in June 0 6
Orach, or Mountain—Quite distinct 0 6
Perpetual Spinach, or Green Beet—Furnishing leaves in great abundance, should be regularly picked so as to encourage good growth; leaves are quite green; sowings should be made in March, April, and the latter part of July 0 6

SQUASH—See Gourds.

STRAWBERRY (Seed).

CULTURE.—Seed may be sown in slight heat during the end of January and February, or if strong plants are required early in the next year, seed may be sown in September in a cold frame. When large enough, plant out in beds in the usual way as required.

Alpine Red ... per pkt., 6d. **Alpine White** ... per pkt., 6d.
Choice Large Fruited Varieties, Mixed, saved from the best kinds only. Per pkt., 6d. and 1s.

Early Purple-top Munich—The earliest of all, fine flavour; suitable for exhibition ... per pint, 2s. 6d. 0 6
Orange Jelly—One of the best ... per pint, 1s. 6d. 0 3

TOMATO, or LOVE APPLE.

CULTURE.—Sow in February or March in heat, pot, and gradually harden off, so that they may be ready to plant out the latter part of May in a sheltered location. For indoor purposes, get good plants in 4 or 5-inch pots; when they show a truss of flower they require fertilising with a camel-hair brush. As soon as the fruit is formed, plant them out in ordinary good soil, 12 inches from plant to plant, pinch out all side shoots, and preserve the large leaves; if fruit fails to form, apply pollen at once, so that the plants bear fruit from bottom to top. Pick fruit as soon as ripe, and never select any other than fruit full of seed; ill-formed ones are disappointing, and often get seedsmen and gardeners in bad reputations on this account.

TOMATO, PRINCE BORGHESE.

Per pkt.—s. d.

- Prince Borghese**—A wonderful productive and useful variety, the large scarlet egg-plum like fruits ending in a peculiar point (a singularity which no other kind has) are joined to big clusters, each reaching often the weight of several pounds. The fruits are very firm and fleshy, and therefore exceedingly valuable for the preparation of salads and sauces as well as for preserves. Their skin being rather thick, if hung up properly, they may be kept for a long time in good condition ... 1 0
- Alice Roosevelt**—Among the earliest; of globular shape, great size, quite smooth, and of a beautiful dark scarlet colour 6d. and 1 0
- Money Maker**—An enormous cropper, perfectly globular fruits of a scarlet colour; solid flesh; fine flavour ... 1 0
- Ham Green Favourite**—Good size, scarlet, and of fine shape; a wonderful cropper ... 6d. and 1 0

- Cannells' King**—Brilliant red; full, very free setting, and is certainly by far the best variety for flavour ... 6d. and 1 0
- Cannells' Open Air**—A superior and first-rate variety for outdoors ... 6d. and 1 0
- Conference**—Medium-sized fruit, perfect in form, rich in colour, and freely produced, not only under glass but outdoors 6d. and 1 0
- Duke of York**—Rich scarlet, round in shape, flesh very firm, fine flavour, splendid cropper ... 6d. and 1 0
- Frogmore Selected**—Of good medium size, deep bright red, smooth and almost round, firm and solid. For early forcing unequalled. Free setting. Also suitable for outdoor cultivation 6d. and 1 0
- Golden Jubilee**—Handsome. Clear golden-yellow. Flavour delicious. Raised at the Royal Gardens, Windsor 6d. and 1 0
- Holmes' Supreme**—Short jointed, stiff and sturdy growth; fruit medium size, smooth and round, firm flesh ... 6d. and 1 0
- Lawrenson's No. 3**—Remarkable for its free setting and dwarf habit, medium size, deep crimson, wonderfully heavy cropper 6d. and 1 0
- Prolific**—Early, and a fine setter; fruit perfectly smooth; rich crimson. For pot culture, in the greenhouse, as a market or exhibition variety, it is unsurpassed ... 1 0
- Queen Alexandra**—It gives a very heavy crop of large fruit, perfectly smooth, and symmetrical, splendid colour, and of unequalled flavour ... 6d. and 1 0
- Sunrise (New)**—Rich scarlet; one of the earliest. First Class Certificate, R.H.S. ... 1 0
- Swanley Superlative**—Of globular form, rich colour, and a heavy cropper; of good market size and quality, very solid and weighs well. Continues fruiting for a long period 6d. and 1 0
- Tuckswood Favourite**—Dwarf compact habit, fruit round, smooth, handsome, brilliant red colour, medium size 6d. and 1 0
- Winter Beauty**—A useful variety for winter work; freely producing highly coloured fruit of medium size and fine flavour 6d. and 1 0

OTHER VARIETIES CAN BE SUPPLIED.

VEGETABLE MARROW.

CULTURE.—The seed may be sown in a slight heat the end of March, and shifted from the pots about the middle of May, when select an open piece of ground and throw out holes from 2 to 3 feet square and 1 foot deep, which should be at least 12 feet apart, the soil thrown out being used to raise the sides. A layer of dry leaves or litter should be spread over the bottom, and afterwards a sufficient quantity of ordinary good soil, wherein a small portion of leaf soil and spent manure has been mixed, to refill it. The plants being hardened off, should receive at the time of planting a good watering, and be shaded and protected as long as necessary. Planted in this manner they make firmer and shorter jointed growth, are more prolific, less water required, and are not so liable to go off when in full bearing, as often happens under a more forcing treatment. They can also be grown with success outdoors by putting in a few seeds the first week in May, where they are to remain.

Per pkt.—s. d.

- Cannells' Cream**—Splendid for exhibition ... 3d. and 0 6
- Cannells' Early Prolific**—A heavy cropping kind, setting its fruit quicker than some varieties ... 3d. and 0 6

ONIONS, PLANTS.

Small Plants out of Boxes, and Plants in 2½-in. pots, well-hardened off, and ready for planting out first or second week in April.

Owing to the increasing demand for our Onion Plants, we have made special preparations for growing the undermentioned exhibition kinds in small and large plants, the former in boxes and the latter in pots, these we strongly recommend to our customers as, having received no check in their growth, ultimately make the best plants and the finest exhibition bulbs.

We should esteem it a favour, when it is possible, for customers to order all Potted Plants before the 1st of April, otherwise we cannot guarantee to supply.

CANNELLS' LAWN GRASS SEEDS,

Fresh, Well Cleaned, and Perfect,

**For PARKS, TENNIS LAWNS, TERRACES, CRICKET GROUNDS, PLEASURE GROUNDS,
BOWLING GREENS, GOLF LINKS, TOWN LAWNS, UNDER TREES, &c.**

THERE is nothing more essential to a rural or suburban residence than a beautiful lawn with its close velvety turf. In sowing down a lawn be sure the soil is perfectly clean, and if poor a good dressing of loam should be well spread over about 3 or 4 inches deep. After being well rolled and raked very fine the seed may be sown broadcast and as evenly as possible, then rolled down. In a few weeks the grass will appear and be ready for cutting, which operation should be often performed, using the scythe until the lawn be well established, when it may be cut with machine and rolled as frequently as required. It should be sown in April, May, August, and September, always taking advantage of the most suitable weather.

	Per lb.	Per Peck.	Per Bushel.
Finest Mixed Lawn Grass , a choice mixture of dwarf evergreen grasses, suitable for Tennis Courts, Garden Lawns, Bowling Greens, &c.	s. d. 1 6	s. d. 7 0	s. d. 25 0

Perennial Rye Grass , cheap grass seed for odd purposes	0 4	—	7 6

1 pound will sow 300 square feet; 1 peck will sow 2,400 square feet; 1 bushel, 10,000 square feet; 4 bushels, 1 acre.

Cilmax Lawn Sand (non-poisonous), for destroying Moss and Daisies, and other rough-leaved weeds having surface roots, at the same time promoting the growth of the finer grasses. It quickly transforms a weedy, neglected Lawn into a perfect sward. Sample tins 1/3, 7 lbs. 2/-, 14 lbs. 3/6, 28 lbs. 6/-, 56 lbs. 11/-, 1 cwt. 20/-. 28 lbs. will dress 100 square yards.

Lawn Sand and Weed Destroyer.—An excellent preparation in the form of a white powder for destroying Daisies, Buttercups, Dandelions, and other weeds in lawns; it also encourages the growth of grass. Per tin, 1/-

Special Quotations made for large quantities of the above.

PERMANENT PASTURE GRASSES, 26s. to 35s. per acre.

According to the varieties used in mixture.

RENOVATING MIXTURE FOR PASTURES, per lb., 10d.; per cwt., 80s.

We recommend sowing 2 to 3 bushels of Mixed Grasses and 10 to 12 lbs. of Mixed Clovers per acre for Permanent Pastures; and to Renovate 1 bushel Mixed Grasses and 4 lbs. Mixed Clovers or more, according to conditions of existing crop.

Suitable Mixtures for any particular situation or soil can always be supplied, if the general nature of the soil and the situation of the field is described when making inquiries.

CANNELLS' Plant and Vegetable Manure.

An essential aid to Nature and Greater Perfection.

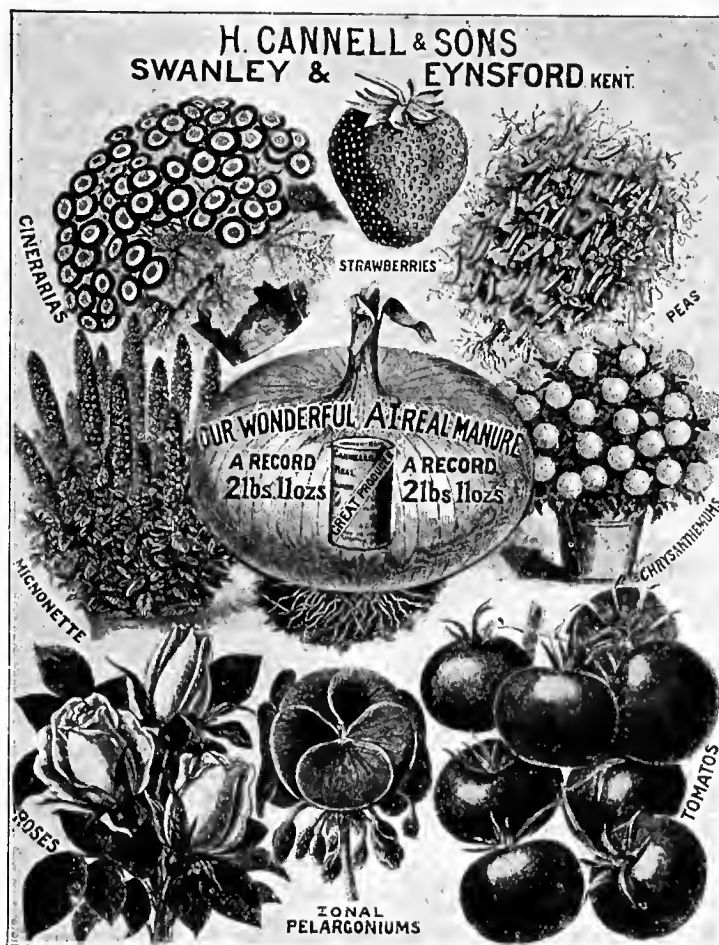

(SPECIALLY PREPARED AND ALWAYS RELIABLE.)

TREBLE YOUR PRODUCE—QUALITY AND QUANTITY COMBINED.

For GREENHOUSE PLANTS, FOLIAGE and FLOWERING PLANTS, ROSES, VINES, FRUIT TREES, VEGETABLES, FLOWER GARDENS, and LAWNS.

ALWAYS AN ABUNDANCE OF FLOWERS.

THE properties of this Manure go direct to make Flowers, Fruit, and Vegetables more brilliant, larger and finer, without the gross foliage. After one gets used to it they will soon gauge the exact strength that is necessary for any plant desired to have extra fine, the great thing is not to over-apply it, but, if used with discretion, this is the most convenient and valuable of all Manures—it is effect in a fortnight is marvellous—and those who use it double their produce. We have several who leave us standing orders for large quantities to be sent at stated times. All are charmed with its results, no greenhouse or garden ought to be without it, and for all who wish to be first at exhibitions, it is absolutely necessary. Every shilling so expended gives another in return, and often two.

DIRECTIONS FOR USE.

FOR LAND IN GOOD CULTIVATION AND GROWING CROPS.—Three-quarters of an ounce to the square yard, one and a half cwt. to the acre. Mix with treble its quantity of fine, slightly damp soil, and scatter it regularly; you can see to a line how far it has been put.

FOR POOR LAND AND POTATOES.—Four to six cwt. to the acre.

FOR POTTING.—One ounce to the bushel of good compost, and thoroughly mix.

TOP DRESSING.—Two ounces to a bushel of good soil.

LIQUID MANURE.—Half ounce to a gallon of water, and increase it a little twice a week until the plants are well in flower.

FOR LAWNS.—Scatter broadcast at the rate of 1½ ounces to the square yard, afterwards to be well watered.

DOUBLE production of everything is obtained by using it. Nothing is so important in every part of the garden as two or three applications during the season. It gives more than satisfaction to whatever it is applied to, and in most cases trebles the size. A 1-lb. tin will show its effects and guarantee its general use.

1-lb. tin 1s., post free 1s. 4d.; 3 lbs. 2s. 6d., post free 3s.; 7 lbs. 4s., post free 4s. 8d.

In bags, 14 lbs. 6s.; 28 lbs. 10s. 6d.; 56 lbs. 18s.; 1 cwt. 30s.

CHAMPION LAWN WEEDER.

Patent No. 21170—98.

It consists of a pair of sharp chisel-pointed tongs or fingers, mounted on long handles to avoid stooping.

The tongs are pressed down on each side of a weed, which is then gripped below the crown and is drawn up by the roots—quickly done and without exertion.

Should be used when the soil is moist.

A Simple and most Effective Tool for extracting Weeds from Lawns.

Price 4/- Postage 6d. extra.

GLASSES

to catch all wasps and bees, and thus secure perfect fruit and prolong their season.

1/- each; 10/- per dozen.

BAGS

for keeping Grapes effectually.

Without wires, 4d. each; 3/3 per dozen.

THE FOUR OAKS UNDETABLE SYRINGES.

All guaranteed against indentation of working barrel for three years. The most perfect Syringes ever placed in a Gardener's hands.

(Prices liable to fluctuate according to the cost of Copper.)

- No. 1.—The Gardener's Ideal Syringe. Special best quality, of highest possible finish, complete with two roses and jet, with quick-filling ball valves, teak handle.
 1 1/2 x 20 in., 21/-; 1 3/4 x 20 in., 25/-
 „ 2.—Second quality, splendid value 1 1/2 x 18 in., 17/6; 1 3/4 x 18 in., 21/-

The handiest and best spraying Syringe on the market. Gives a fine mist or vapour-like spray which can be regulated according to pressure used. Invaluable for spraying plants, distributing insecticides, &c.

No. 9 1 1/2 in. x 20 in., 12/6; 1 3/4 in. x 20 in., 16/6

ANGLE JOINT.—For use on the Four Oaks Undentable Spraying Syringe. A most useful addition. Enables the user to spray the undersides of leaves in a manner hitherto impossible.

Prices 5/6 for 1 1/2 in.; 6/- for 1 3/4 in.

No. 10. THE FOUR OAKS PLAIN SPRAYING SYRINGE.

With Patent Spraying Nozzle, with Quick-filling Valve, and one ordinary Rose. Polished and Lacquered.

In order to meet the demand for a cheap Spraying Syringe, we have decided to offer the Spraying Syringe before described, without the Undentable Covering, and, of course, without the three years' guarantee. It will, even without the Undentable Covering, be found to be superior to any other Spraying Syringe on the market, being well made and well finished, with Quick-filling Ball Valve. A separate rose will also be supplied, so that the Syringe can be used as an ordinary Syringe whenever desired. At the following prices, this Syringe will, we think, be found to be the cheapest and most useful Spraying Syringe that can be obtained.

14 in. x 1 in.	6/4	20 in. x 1 1/4 in.	11/4
20 in. x 1 in.	8/4	20 in. x 1 1/2 in.	12/10

Angle Bends for spraying under leaves and branches.

1 in. and 1 1/4 in., 1/3. 1 1/2 in., 1/6.

Strong and well finished. Carriage paid, 4d. extra.

"XL ALL" WEED KILLER (IN LIQUID).

4-gallon „	s. d.		
3	0		

NOTICE.—For the greater security in transit, Steel Casks are now being used in place of Wood ones for Weed Killer, as there is less danger of a leakage. The advanced price charged for these on invoice will make no difference to customers, as full price is allowed when returned Carriage Paid. We can confidently recommend the above as a most safe and effectual remedy.

"XL ALL" VAPORISING COMPOUND

(IN DRY CAKES.)

These Cakes when used in the Fumigators, first melt to a liquid and then pass entirely away as vapour, which is fully as effective and safe as that produced by the Liquid Vaporising Compound. The advantages of this form are—convenience of packing, light and cheap for carriage, no risk of waste from breakage, and very clean in use. They are packed in tins to correspond precisely with the Liquid contained in the various sizes of bottles, viz., boxes for 40,000, 20,000, 10,000, 5,000, and 2,000 cubic feet of space, and at the same prices.

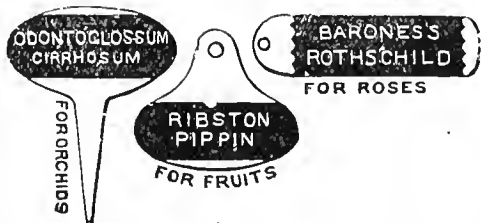

CHANDLER'S COMBINED WALL NAIL.

Made with malleable iron unbreakable shanks and soft lead heads or clips, and are practically indestructible. After the Nail is driven into the wall, the lead clips can be turned over the branch with the fingers, and will then hold it firmly into position without injury to the bark.

In boxes of 100 assorted $\frac{1}{2}$ in. to 1 in., 1/-; $1\frac{1}{4}$ in. to $1\frac{1}{2}$ in., 1/6 per box; 2 in. only, 2/- per box.

Can also be had with longer shanks for wiring walls, $2\frac{1}{2}$ in., 2/4; 3 in., 2/8 per box of 100.

ACME LABELS.

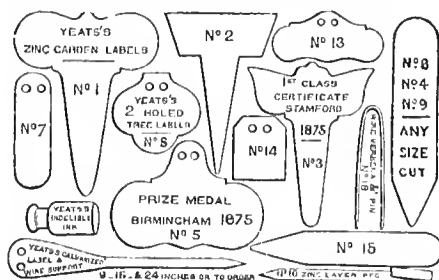

Acme Label for ORCHIDS, 3s. 6d. per Dozen, or 36s. per Gross.

Acme Label for FRUITS, 1s. 9d. per Dozen, or 18s. per Gross.

INDELIBLE INK for the above, per bottle, 6d. and 1s.

The Labels may be written on with the Indelible Ink, or can be painted white and marked with ordinary lead pencils while wet, or when dry with black paint.

The "Ideal" Copper Plant and Tree Labels, Embossed in raised letters with the name for Roses only, 1/- per doz.

ACME CAST LABELS.

THESE NEW LABELS have been introduced to supply a long-felt want for a label similar to the now well-known "Acme" Labels, made for Roses, Fruits, Orchids, and Chrysanthemums, but of various sizes, and capable of being made with any name.

They are made in commercially pure zinc, with raised bright letters on a black ground, and are practically indestructible. A further improvement has been made by putting the labels on a double stem where possible, which, in addition to giving the necessary strength to the label, prevents it being blown round by the wind, gives it a neater and less conspicuous appearance, without detracting from its usefulness.

Although in every way superior, these labels will be found to compare in price favourably with any on the market.

PRICES.

Patent "Ideal" Lead-capped Copper Untearable Eyelet Label, with Aluminium wire, quite plain, no embossing.

Large size, 3/6 per 100; 6d. per doz., Ditto, with copper wires, small, 3/- per 100; in boxes of 30 labels, copper wires, 1/- per box; in boxes of 50 labels, copper wires, 1/6 per box.

THE SPRINGTHORPE CUP AND TUBE.

PROVISIONALLY PROTECTED, No. 7141, 1894.

For EXHIBITING CHRYSANTHEMUMS,

And other Flowers.

THE Cup has one Brass Side Spring which enables the exhibitor to adjust his flower with speed and accuracy in the Tube or Water Container. It also has a very simple arrangement to prevent the necessity of plugging. The Tube or Water Container has also one Brass Side Spring which passes through a Flange fixed to the Showboard from the under side.

By using these Tubes the exhibitor can raise his flowers seven inches from the board with instant adjustment.

ITS ADVANTAGES ARE—

Simplicity, Ease of Adjustment, Durability, Efficiency, and Great Saving of Time.

For Incurved size	...	2 in. diameter.
" " "	...	2 1/2 " "
Japanese	...	3 " "

Price 9/- per doz.

Additional lengths to further raise the Water Tubes, 2/6 per doz.

FLORAL AIDS.

Three sizes; those at 1s. and 1s. 6d. are chiefly intended for use in table decoration; the larger one at 2s. 6d. is more suitable for heavy flowers, such as Pæonies, Roses, Arum Lilies, Gladioli, &c., also for supporting Rushes, Grasses, Reeds, &c.

I am pleased to say that I won several First Prizes for flowers grown from seed I obtained from you at our Show, and for all-round excellence your seeds are hard to equal.

The seeds you supplied for several years are the best I have ever had.

Mr. C. C., Nottingham.

The Dahlias, Pelargoniums, and Zonal Geraniums you sent me last year were magnificent, as also the seeds you sent, and those seeds received this year have all-germinated, and I am sure will prove successful. I am more than delighted with my success with all your plants and seeds.

Mr. F. C. L., Newera Eliya, Ceylon.

The Double Begonia seed you sent me has always given splendid results. Indeed, the flowers were exceedingly nice, and I never saw anything like these. It afforded me the utmost pleasure showing them to every visitor, and they were greatly admired by everyone who saw them, and asked where I had them from. Please accept my best thanks for your kindness in sending me such a quality.

Mr. J. Z., Gross-schonau, Germany.

HARDY ANNUALS may be sown from February till the end of September; March, April, and May are the best months for general Summer display; June and July for Autumn blooming; August and September for Spring flowering. **Half-hardy Annuals**—Sow from the beginning of March to the end of May; place in a frame on a gentle bottom heat. When sowing from the middle of April to the end of May they may be easily raised without artificial heat, and by selecting a warm, sheltered situation, and covering them with a hand-light till they are strong enough to bear transplanting.

BIENNIALS AND PERENNIALS—The most select and tender varieties for Summer and Autumn blooming may be sown in a gentle heat in March and April, and pricked out into pots until fully established, and then potted off singly, or transplanted into the open ground, as required. The hardier varieties may be sown in the open ground, in prepared beds, in June and July, and when strong enough, transplanted to where they are intended to bloom the following year.

HERBACEOUS PLANTS are those Perennials which lose their stems annually, whilst the roots continue alive in the ground.

CANNELLS' PRIZE MEDAL EYNSFORD DWARF ANTIRRHINUMS.

AWARDED A SILVER MEDAL BY THE R.H.S.

For years we have been selecting our well-known and richly-varied strain of Dwarf Antirrhinums until we have succeeded in obtaining most satisfactory results. They possess a considerable value for beds and borders, as their free branching habit enables them to continue in bloom for a much longer period than the taller kinds, which produce a comparatively small number of spikes, and, moreover, the lower part of the older spikes are so hidden by those of later development that the seed pods resulting from the earlier flowers, which are so unsightly in the case of the tall strains, are not seen. We have a very fine strain about six inches in height, and furnished with large numbers of spikes bearing flowers distinguished by their large size and effective colouring.

179. ———— Striped and bizzared colours, mixed ...	0 6

CANNELLS' SELECTED COCKSPUR AQUILEGIAS.

CANNELLS' SELECTED SEEDS OF THE FOLLOWING VARIETIES. Per pkt.—s. d.

180. **Aquilegia, Columbine—Long-Spurred Hybrids**—It is scarcely possible to lavish too much praise upon this graceful and elegant family of plants, being most beautiful in habit of growth, colours, and form of flowers. After several years' careful selecting and re-selecting, we have obtained a splendid strain, which we now offer to all admirers of this graceful and delightful flower. Amongst these hybrids will be found many novel combinations of pleasing shades of colour. They prefer a moist and sheltered position, with as much exposure to the sun as possible; of robust habit and perfectly hardy, flowering most profusely during May and June; admirably adapted for cutting purposes and the home decorations; highly recommended for table decorations, hp. 6d. & 1 0
181. **Californica Hybrida**—Large centre petals yellow, deep orange-red sepals and spurs, hp, 2 ft. 0 6
182. **Chrysantha**—Beautiful yellow, hp, 2 to 3 ft. 6d. & 1 0
183. **Cœrulea Hybrida**—Flowers are large, sulphur-yellow and pale blue, hp, 2 ft. 6d. & 1 0
184. **Cœrulea Hybrida Fl. Pleno**—Shades of yellow, light and dark blue, and white, all being of the so-called long-spurred type, hp... .. 1 0
185. **Grandulosa (Grigor's Variety)**—Tips of petals white, sepals dark blue, large; beautiful, hp, 1½ to 2 ft. 0 6
186. **Grandiflora Alba**—Pure white; one of the best for cutting, hp, 2 ft. 0 6
187. **Skinneri**—Red, with tips of the petals yellow, hp, 2 to 3 ft. 0 6
188. **Arabis Alpina**—For permanent edging or Spring bedding one of the best plants in cultivation; flowers white, hp, ½ ft. 0 6
190. **Aralia Sieboldii**—Handsome, ornamental foliage plant, 3s, 3 to 6 ft. (*New seed ready in April.*) 0 6
191. **Aretotis Grandis**—The ray florets pure white on the upper surface narrow yellow zone at their base, reverse of petals pale lilac, hla, 2 ft. 0 6
192. **Argemone Grandiflora**—White, ha, 2 ft. 0 6
193. **Mexicana (Devil's Fig)**—Yellow, ha, 2 ft. 0 6
194. **Aristolochia Elegans**—A free-flowering species of neat growth. Can be grown in the stove or warm greenhouse, gp, 1s. & 2 0
195. **Armeria Formosa Hybrida**—The colours consist of flesh-colour, carmine, carmine-rose, crimson, and lilac, hp, 1½ ft. 0 6
196. **Asclepias Curassavica**—Reddish orange-scarlet; very effective and useful for either the stove or greenhouse; of great use for button holes, sprays, and table decorations, gp, 2 ft. 0 6
197. **Asparagus Plumosus**—Most useful for pots or bouquets, hhp, 2½ ft. 1s. 6d. & 2 0
198. **Sprengeri**—A handsome greenhouse variety of rapid growth, drooping naturally and gracefully from pots or hanging baskets. The fronds are frequently eight feet in length. Useful for bouquets, wreaths, sprays, or decoration of the table 1s. & 2 0
199. **Asperula Odorata (Woodruff)**—White, sweet-scented flowers, dwarf; thrives well in the shade, hp... .. 0 6
200. **Azurea-setosa**—Rosy-blue, ha, 1 ft. 0 6

OUR OWN KENTISH-GROWN AND SELECTED ASTERS

Are known and celebrated as the best.

AWARDED SEVERAL SILVER AND SILVER-GILT FLORAL MEDALS BY THE
ROYAL HORTICULTURAL SOCIETY.

ARE THE LARGEST AND THE MOST PERFECT SHAPE IN EXISTENCE.

CULTURAL DIRECTIONS.—Sow Aster Seed in February and March in pots, or on a spent hot-bed in drills, 4 inches apart. Soon after the plants are up prick out into a cold frame, or under hand-glasses, 3 to 4 inches apart, from whence they can be planted out when 4 inches high. Select a showery weather for planting, when the ground is in good working order; plant out in rows 1 foot apart each way. To grow Asters to perfection a rich deep soil is indispensable, and during dry weather they should be watered, and a top dressing of well-rotten manure applied early in August. Be very particular that they are always thoroughly free from insects when they are planted out, otherwise the leaves will become curled, and vigor and protection lost for the season. If required for exhibition the buds should be thinned, and the plants well watered with liquid manure. During the last fortnight cover with glass.

Per pkt.—s. d.

Cocardeau, or Crown Aster—A very striking and distinct class, each flower having a white centre surrounded by rose, crimson, blue, &c., hha, 1½ ft.

201. MIXED COLOURS 6d. & 1 0

202. COLLECTION of 6 distinct colours, separate, 1s. 6d.

Comet Aster—A truly beautiful and elegant class, resembling in form the Japanese Chrysanthemum; long, wavy, gracefully arched, and slightly twisted petals, a peculiarity which distinguishes this class from others; very useful for the decoration of the dinner table and like purposes; flowers are large and very fine, and well adapted for vases. 1 ft.

327.	— Willow-leaved—Dark narrow leaves, hb, 1 ft.	...	6d. & 1 0

CANNELLS' TUBEROUS BEGONIAS.

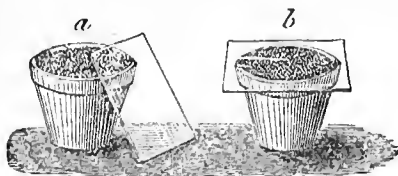

THE GOLD CLOCK COLLECTION.

The highest and most important award yet given, and indicating the excellency of our strain.

See our *Floral Guide* for grand new kinds. Our Seed is saved from the large-flowering best-shaped varieties only

We have been awarded innumerable First-Class Certificates. See full particulars in *Floral Guide*.

Tubers in the dormant state supplied from the end of October until March. After that date in plants.

Scatter the Seed on a level, moderately-firm surface, cover with glass and paper, keep it in darkness until germinated; sow and place in heat at any time of the year, or as soon as the seed is ripe; pot the young seedlings off as soon as large enough, and re-pot when necessary; in three or four months they begin to display their beautiful blooms.

Cannells' Grandiflora, Single—

328. Amber.	336. Pink and White.
329. Buff.	337. Primrose.
330. Crimson.	338. Red.

377. ——— *Alba*—White, ha, ½ ft. ... 0 3

CALCEOLARIAS.

AWARDED THE GREAT SILVER CUP.

Sow in August, and from the moment they are up do everything to keep them growing, and the faster the better. Rain water is absolutely necessary. Let them be carefully shifted from the small pot to the 5-inch. Let the night temperature and moisture be such as to cause a nice refreshing dew to stand on the surface of the leaves every morning. This wards off insects and gives vigour to the plant, but it should be dispelled during the day by the admission of air. Keep them in a cold frame, with plenty of air and moisture at all favourable times. No frost must touch them. The grand secret is to keep all green fly away, and if coddled in a house, they are almost sure to be attacked. If so, the most effectual means must be adopted by placing them in a lofty position and fumigating, as per directions given (see Guide); and at the very moment of the first curled leaf every fly must be destroyed. As soon as the first root appears at the drainage hole, let them be shifted intact and without injury into their blooming pots, making sure that every pot is well drained, for no plant is more liable to become sickly and yellow in wet sour soil than the Calceolaria. On the first signs of sharp weather, place in a house near the glass, with temperature not above 50 deg., with plenty of moisture; and as soon as the pot become well filled with roots, give liquid manure once a week, and stake out and fumigate thoroughly just before they show flowers, and the result will be a grand sight. Soil similar to that mentioned for Cinerarias and Primulas, excepting animal manure, substituting soot and bone meal to give darker foliage.

378. *Swanley Hybrid Dwarf Perfection*—Gp. 1s. 6d. & 2 6
379. *Hybrida Grandiflora, Olympia*—A large-flowered
hybrid; large and well-formed flowers of a deep brown red
colour on bright yellow ground, gp, 1½ ft. ... 1 6
380. *Golden Glory*—Flowers bright golden yellow; quite
hardy; a valuable garden and greenhouse plant 1s. 6d. & 2 6
381. *Shrubby*—Dwarf bedding varieties, hhp, 1½ ft. ... 1 6

392. ——— *Cannells' Grandiflora*—Yellow; a large free-
flowering variety, hp, 2½ ft. ... 0 3
393. *Callirhoe digitata*—Crimson, free, ha, 2 ft. ... 0 3
394. *Calendula Officinalis fl. pl. "Meteor"*—Striped flowers,
brown-orange on a pale straw-coloured ground, ha, 1 ft. ... 0 3
395. ——— *"Orange King"*—Dazzling deep orange, ha, ¾ ft. ... 0 3
- Californian Poppy—See *Eschscholtzia*.
396. *Campanula Carpathica*—Blue, hp, ½ ft. ... 0 3
397. ——— *Carpathica Alba*—White, hp, ½ ft. ... 0 3
398. ——— *Celtidifolia*—Light blue flowers; blooms first season,
hp, 2 ft. ... 0 6
399. ——— *Garganica*—Pale blue; thrives well either on a
rockery or in a border; valuable also for suspension in a
window or conservatory, hp ... 1 0
400. ——— *Glomerata Acaulis*—Dwarf; purple flowers, showy
for the rock garden; comes nearly true from seed, hp ... 1 0
401. ——— *Grandiflora (Platycodon grandiflorum)*—Large; blue,
flowers in Autumn; effective, hp, 2 ft. ... 0 6
402. ——— *Alba*—Pure white, hp, 2 ft. ... 0 6
403. ——— *Latifolia*—Blue flowers, hp, 3 ft. ... 0 3
404. ——— *Medium Calycanthema*—Blue, hb, 2 ft. ... 0 3
405. ——— *Alba*—hh, 2 ft. ... 0 3
- Two splendid showy varieties of Canterbury Bells, the calyx forming
an elegant cup round the base of the bell, and being of the same beautiful
colour as the corolla. These varieties come quite true from seed.
406. ——— *Medium (Double Canterbury Bells)*—Mixed, hb, 2 ft. ... 0 3

407. *Campanula Mirabilis*—Pale blue or lilac flowers. When
in full bloom the plants present a regular pyramid. Fine
for pots, hp, 2 ft. ... 1
408. ——— *Pyramidalis (Chimney Campanula)*—Pale blue, hp,
3 ft. ... 0
409. ——— *Alba*—This and the above make hand-
some pot plants for the decoration of conservatories and the
border, hp, 3 ft. ... 0 3
410. ——— *Persicifolia Backhousei (grandiflora alba)*,
single—Of the purest white. Equally as valuable for cut
flowers as for the border, hp ... 6d. & 1 0
411. ——— *Grandiflora Cœrulea*, single—
Superb large blue flowers, hp ... 6d. & 1 0
412. ——— *Pfitzeri*—Large saucer-shaped flowers,
which are double and semi-double; blue. Seeds produce
about 60 per cent. of double flowers, hp ... 1 0
413. ——— *Pyramidalis Compacta, Blue*—Distinct from the
older form, the plants being dwarfier, and the flowers larger;
hardy and adapted for pot culture; deep blue flowers, hp,
3 ft. ... 6d. & 1 0
414. ——— *White*—Same habit as the preceding,
but pure white flowers. 3 ft. ... 6d. & 1 0
- Campion*—See *Agrostemma*.
Canary Creeper—See *Tropæolum*.
415. *Candytuft, Little Prince (Iberis coronaria princeps)*
—Massive spikes of large pure white flowers; for groups,
horders, and as a pot plant, of grand service, ha, ½ ft. ... 0 6
- Candytuft (Iberis)*—One of the most useful of annuals.

CANNELLS' GOLD MEDAL CANNAS.

During 1909 our Exhibits of glorious Cannas were again appreciated and much admired.

GOLD MEDAL FRANCO-BRITISH EXHIBITION.

SILVER CUP FOR CANNAS AT THE GREAT TEMPLE SHOW.

LARGE GOLD MEDALS FOR CANNAS, LONDON AND SHREWSBURY GREAT SHOWS.

437. A Collection of 12 distinct varieties, 2s. 6d. per pkt.

Per pkt.—s. d.

Per pkt.—s. d.

438. **Cannas (Indian Shot)**—Owing to the seeds being so very hard (hence the name of Indian Shot) occasionally considerable time elapses before germination takes place. We obtain good results by putting the seeds in a tin box, covering them with water, and then placing it upon the hot pipes or in a propagating frame, and as the outer covering is broken by the germs starting into growth, so the seedlings are removed to small pots, and kept in a temperature of about 70 to 75 degrees, and from then onwards they will be found of easy culture, hhp. For full collection of best named varieties that can be supplied as plants, see Floral Guide ... 6d. & 1 0
Cape Gooseberry—See *Physalis Edulis*.

CANNELLS' CINERARIAS.

If required to flower in winter, seed must be sown in May or June. The secret of growing well is to grow fast, never allowing them to receive a check, either from being pot bound, dryness of root, or attack of insects, the cooler they are kept the better, just preventing frost reaching them, and giving abundance of air. If the green aphid is not kept thoroughly away there will not be a bloom worth seeing. Of course at all times the keenest observation of extreme temperature must be made for cold, cutting draughts or a too glaring sun, and warmth must be avoided.

CANNELLS' SEED GUIDE, 1910.

CYCLAMEN, CANNELLS' PERSICUM.

OURS ARE THE FINEST AND NEAREST PERFECTION EVER SEEN.

Awarded a Silver Medal by the Royal Horticultural Society for our Strain.

Awarded a Silver Gilt Medal for a collection of plants, and a Certificate of Merit for the Strain, Royal Horticultural Society.

Sow seeds thinly, in a compost of two parts turfy yellow loam, one of peat and leaf mould mixed together, and one part of thoroughly decayed cow-dung sifted very fine, and a little silver sand; cover the seeds to the depth of a quarter of an inch; place the pots on a shelf in the greenhouse, near the glass in the Winter, and in Summer in any shaded pit. Under no circumstances must the surface of the soil become dry. Some of the seeds take four months to germinate.

	Per pkt.—s. d.
548. Giganteum, White Perfection —Pure white flowers of great size and substance	1s. 6d. & 2 6
549. Pink Perfection —A lovely shade of pink, admired by all	1s. 6d. & 2 6
550. King of the Violets —Flowers of a true violet tint, 1s. 6d. & 2 6	
551. Persicum, Mixed —Saved from our finest Prize Collection of the very best, gp, $\frac{1}{2}$ ft.	1s. 6d. & 2 6
552. Giganteum, Mixed —Very large flowers, gp, $\frac{3}{4}$ ft.	1s. 6d. & 2 6
553. Low's Salmon —Distinct salmon colour, most beautiful by artificial light	1s. 6d. & 2 6

	Per pkt.—s. d.
554. Persicum Giganteum, Margaret —Snowy white with silky lilac base, a lovely and delicate hue, marbled foliage	1s. 6d. & 2 6
555. Salmon King —Clear salmon-pink	1s. 6d. & 2 6
556. Persicum Giganteum —Rose, gp, $\frac{1}{2}$ ft.	1s. 6d. & 2 6
557. Salmon-pink , gp, $\frac{3}{4}$ ft.	1s. 6d. & 2 6
558. White , with purple base, gp, $\frac{1}{2}$ ft.	1s. 6d. & 2 6
559. Papilio (The Butterfly Cyclamen) —Edges of the petals are prettily fringed and curled. Mixed	1s. 6d. & 2 6
560. Persicum Giganteum Improved Papilio —A marked improvement as regards to the habit of growth and the size of the flowers	1s. 6d. & 2 6
561. Feathered Pioneer —White, with a distinct crest of the same colour upon the face of each petal	1s. 6d. & 2 6
562. Rose Pioneer —A pretty shade of rose	1s. 6d. & 2 6
563. Salmon Pioneer —Charming	1s. 6d. & 2 6
564. Cyclamen Hardy —For the rockery, hp, $\frac{1}{4}$ to $\frac{1}{2}$ ft.	1 0
565. Cyperus Alternifolius —Adapted for the decoration of the greenhouse, conservatory, or table, gp, 2 ft.	6d. & 1 0

CANNELLS' DAHLIAS.

We introduced Single and Cactus kinds,

And have been Awarded Medals for many years past.

AWARDED
GOLD MEDALS,
YORK, ROYAL AQUARIUM,
and ROYAL
HORTICULTURAL
SOCIETY.

AWARDED
SPECIAL PRIZE,
EDINBURGH.

	Per pkt.—s. d.
566. Dahlia, The Collaret —Ordinary yellow disc with a series of stalked appendices of a collaret form	1 0
567. Gigantea, Single —Large and noble flowers, hha, 3 to 4 ft.	0 6
568. Double Gloria Anemone-formed —Culture is as with the other classes a very easy one. If sown in March-April they will flower in September	1 0
569. Single Mixed —From the finest collection in cultivation, hhp, 3 to 4 ft.	6d. & 1 0
570. Double —Saved from our unrivalled collection of show kinds, hhp, 4 ft.	1 0
571. Double Cactus —Choiceest mixed, from our best named varieties, hhp, 3 to 4 ft.	1 0
572. Cactus-shaped Single —Their characteristic is twisted or fluted petals, hhp	6d. & 1 0
573. Pompon —The pretty double bouquet Dahlias, hhp, 2 $\frac{1}{2}$ to 3 ft. For descriptions, see Guide	6d. & 1 0
574. Datura Chlorantha fl. pl. —Golden, double, scented flowers, hha, 2 $\frac{1}{2}$ ft.	0 3
575. Cornucopia ("Horn of Plenty") —French white, marbled with royal-purple; of easy culture, hha, 1 $\frac{1}{2}$ ft.	0 6
576. Meteloides, syn. Wrightii —Delicate blue and white shaded; very handsome, hha, 2 ft.	0 3
577. Delphinium Brunonianum (the Musk Scented Larkspur) —Light blue shading to purple, black centre, hp, 1 ft.	1 0
578. Cannells' Hybridum, mixed —From one of the best collections. Awarded the Silver Medal of the Royal Botanic Society, Regent's Park, hp, 3 to 5 ft.	0 6
See Collection in Floral Guide.	
579. Cardinale —Handsome species, scarlet and yellow flowers, hp, 3 to 4 ft.	1 0
580. Nudicaule —Flowers scarlet, hp, $\frac{3}{4}$ to 1 $\frac{1}{2}$ ft.	6d. & 1 0

	Per pkt.—s. d.
581. Delphinium Sulpureum (Zall) —Beautiful sulphur-yellow flowers, hp, 3 ft.	0 6
Devil-in-the-Bush —See <i>Nigella</i> .	
582. Dianthus Barbatus (Sweet William), Cannells' Perfection —Colours rich and varied, hp, 1 ft.	6d. & 1 0
583. (Sweet William), Mammoth Holborn Glory —The most perfect formed and largely developed flower of Sweet William in existence, hb	6d. & 1 0
584. Pink Beauty —Of a delicate and pleasing pink colour	6d. & 1 0
585. Scarlet Beauty —Very effective; of a bright scarlet colour	6d. & 1 0
586. Eastern Queen and Crimson Belle — <i>Eastern Queen</i> is beautifully marbled. <i>Crimson Belle</i> is of a rich, vivid crimson-lake, ha, 1 ft. Each, 6d. per pkt. Both colours mixed	0 6
587. Cannells' Heddewigii —Single, easy to grow, and very showy, ha	0 3
588. Heddewigii Nobilis, Royal Pinks —Petals are fringed, colours very bright blood red to shades of carmine, pink, and white. Most useful for cut flowers, ha, 1 $\frac{1}{4}$ ft.	6d. & 1 0
589. Fl. Pl. —Represents the ideal of all the Chinese Pinks, ha	6d. & 1 0
590. Diadematus Fl. Pl. —Flowers large; colours are arranged in zones, varying from lilac and crimson to dark purple; petals are fringed and margined with white, ha, 1 ft.	0 6
591. Fl. Pl., Fireball —Brilliant scarlet; branching bushes; an acquisition, ha, 1 ft.	6d. & 1 0
592. Lacinatus Salmonus Fl. Pl., Salmon Queen —Vigorous and freeblooming, ha, $\frac{3}{4}$ ft.	6d. & 1 0
593. Salmon Queen, Single —Salmony rose; nicely fringed, ha, 1 ft.	6d. & 1 0

CANNELLS' SEED GUIDE, 1910.

		Per pkt.—s.	d.
595.	Dianthus, Snowdrift —Of the purest snow-white, pretty fringed double flowers; effective in a mass, ha ...	6d. &	1 0
596.	— Heddewigii, Count Kerchove —Blood red, veined velvety black ...	6d. &	1 0
597.	— Queen of Holland —Splendid flowers, pure white. A certain percentage show a small ring round the centre, ha	0 6
598.	Diascia Barberæ —Pale pink or chamois rose, hba, 1 ft.	1 0
	Dietamnus —See <i>Fraxinella</i> .		
599.	Didiscus Cœruleus <i>syn. Trachymene</i> —Sky blue flowers, best adapted for pot culture in the green house, hba, 1 to 2 ft.	0 6
600.	Digitalis, Cannells' Foxglove, Gloxinæflora, Improved Large Spotted —An excellent strain, with large flowers. Very striking in a shrubbery. This seed is from our very best kinds, hp, 3 to 5 ft.	0 6
601.	— Lutea Grandiflora —Yellow flower; distinct; hp, 4 ft.	0 3
602.	— Purpurea Alba —Large white flowers, occasionally spotted, hp, 4 ft.	0 3
603.	Dimorphotheca Aurantiaca —Rich dark golden yellow, black disc; very effective, 1 ft. ...	6d. &	1 0
604.	Dracœna (Cordylne) Australis	1 0
605.	— Indivisa	1 0
	Handsome plants for the decoration of conservatory and indoor purposes; also useful as specimens on lawns, terraces, large flower beds during the summer season.		
606.	Eccremocarpus Scaber, syn. Calampelis Scaber —Elegant climber for south walls, verandahs, pillars, &c., hhp	0 3
607.	— Scaber Aureus —A wealth of yellow blossom, hhp	0 6
	Echeverias (Cotyledon) —Splendid plants for bedding purposes. The seed is very dust-like, therefore must be barely covered with soil, and treated very carefully until the seedlings are fit to handle, hhp. To be treated the same as recommended for <i>Calceolarias</i> .		
609.	— Desmetiana, syn. Peacockli —Silvery-white and glaucous hue, slightly tinted red round edges of leaves	1 6
610.	— Metallica Glauca —1½ ft.	1 0
611.	— Rosea —½ ft. ...	6d. &	1 0
	Egg Plant —See <i>Aubergine</i> .		
	Edelweiss —See <i>Gnaphalium</i> .		
	Eragrostis —See <i>Ornamental Grasses</i> .		
613.	Erlgeron Speciosus Grandiflorus Hybridus —From bluish white and pale mauve to the deepest blue. 2½ ft.	0 6
614.	Echinops Ritro (Globe Thistle) —Handsome foliage, globular heads of rich blue; a neat border plant, hp, 3½ ft.	0 6
615.	Eremurus Bungei —Pillar-like spikes of showy yellow flowers and deeper coloured anthers, hp, 5 to 6 ft.	2 0
616.	— Himalaicus —Attractive, dense spikes, snowy white flowers, golden anthers; prefer sheltered positions, hp, 5 to 7 ft.	1 0
617.	— Robustus —Large stately spikes of flesh-coloured flowers; a warm, moist position is best for it, hp, 6 ft.	1 0
618.	Erysimum Arkansanum —Sulphur yellow. Very useful for spring bedding, ha, 1½ ft.	0 3
619.	— Perofskianum —Orange-coloured, ha, 1½ ft.	0 3
620.	— Pulehellum —Lemon-yellow, flowers in early spring. For bedding, sunny positions, or rockwork, hp, ½ ft.	0 3
622.	Eryngium Amethystinum —Suitable for planting in groups, hhp, 2½ ft.	0 3
623.	— Giganteum —Very effective, hb, 2½ ft.	0 3
625.	Eschscholtzia Californica Caniculata Rosea —Rosy-white petals, fluted, ha	0 3
626.	— — — — — Pure white	0 6
627.	— — — — — Sulphur yellow	0 6
628.	— Carmine King —Carmine-rose, of quite a novel and beautiful effect, ha. Award of Merit ...	6d. &	1 0

		Per pkt.—s.	d.
629.	Eschscholtzia Crocea —Yellow flowers, ha, 1 ft.	0 3
630.	— Erecta Compacta, Dainty Queen —Pale coral pink; exquisite	0 6
631.	— Mandarin —Orange and scarlet, ha, 1 ft.	0 3
632.	— Rose Cardinal —Rose-coloured, ha, 1 ft.	0 3
633.	— Maritima —Bright light yellow, with deep orange, distinct spots at the base of petals, ha, 1 ft.	0 3
634.	— Mixed , ha	0 3
	Eucalyptus —The undermentioned will be found useful especially for sub-tropical effects:—		
635.	Eucalyptus Globulus (The Blue Gum of Tasmania) —A pretty pot plant and also for sub-tropical effect, hhsh, 4 to 200 ft.	0 6

CANNELLS' PRIMULAS.

Our Strains are well known to be the best in the World.

Awarded the Highest Diplomas for our Varieties
at the Chicago Exhibition.

Awarded more Medals for Collections of Plants, and Certificates of Merit
for the Strains than all other firms put together.

CANNELLS' STELLATA CLASS.

- | | Per pkt.—s. d. |
|---|----------------|
| 990. Red Rover —Flowers are of increased size, of more leathery substance, and of greater brilliancy of colour—a clear carmine-red; fine pyramidal habit | 2s. 6d. & 3 6 |
| 991. Triumph —The star-like flowers are of a rich magenta shade; very floriferous | 1s. 6d. & 2 6 |
| 992. White Spray —Where a mass of pure white is required either in the greenhouse or conservatory this is of surpassing beauty and effect | 1s. 6d. & 2 6 |
| 993. Blue —Grand addition to this class | 1s. 6d. & 2 6 |
| 994. Lady E. Dyke —Of the purest white; small yellow eye; free-flowering, even when grown in small pots; retains its blossoms for a long time | 1s. & 1 6 |
| 995. Miss Irene —Light foliage, salmon-pink of a very pretty shade, much admired | 1s. & 1 6 |
| 996. Mrs. H. Cannell —A fine improvement, producing pure white flowers | 1s. 6d. & 2 6 |
| 997. Red Lady —Producing in great abundance flowers of a decided rich red shade | 1s. & 1 6 |
| 998. Salmon Beauty —Dark foliage, rosy salmon, very bright | 1s. & 1 6 |
| 999. The Lady —The forerunner of this class; beautiful dark foliage and stems, pure white star-like flowers, and bright yellow centre; very floriferous; useful throughout the winter for supplying cut bloom for table decoration | 1s. & 1 6 |
| 1000. Cannells' Primula Stellata, Mixed —All the above named | 1s. & 1 6 |

CANNELLS' PRIMULA STELLATA HYBRIDA.

Intermediate in form of flowers and growth between the ordinary *Sinensis* and the *Lady* or *Stellata* type. Free-flowering and effective.

- | | |
|--|---------------|
| 1001. Mrs. R. W. Cannell —A superb and delightful variety, flowers of a snowy whiteness. The rich colouring of the foliage and stems is most attractive | 1s. 6d. & 2 6 |
| 1002. Double Pyramidalis Alba —The innumerable quantity of pretty well-shaped semi-double pure white flowers produced on even small plants is most remarkable | 1s. & 1 6 |

PRIMULA SINENSIS.

- | | |
|---|---------------|
| 1003. Orange King —Orange salmon and terra-cotta, a new colour | 1s. 6d. & 2 6 |
| 1004. Dr. Nansen —Crimson-red; large and fine | 1s. 6d. & 2 6 |
| 1005. Crimson King —Deep rich crimson, dark brown eye | 1s. 6d. & 2 6 |
| 1006. The Duchess —Pure white, with a zone of carmine-lake, clear yellow eye | 1s. 6d. & 2 6 |
| 1007. Grandiflora, Eynsford Red —Stout leathery leaves and robust compact trusses of beautiful flowers. Much admired | 1s. 6d. & 2 6 |
| 1008. Swanley Blue —It is a beautiful mauve, perfectly distinct; very striking. 9 in. | 1s. 6d. & 2 6 |
| 1009. The Sirdar —Splendid bold flowers; rich salmon. A grand variety | 2s. 6d. & 3 6 |
| 1010. Pink Perfection —Of a pleasing shade of salmon-pink; always admired; very free | 1s. 6d. & 2 6 |
| 1011. Cannells' White —Of vigorous dwarf growth; bold trusses of pure white flowers of great substance | 1s. 6d. & 2 6 |
| 1012. Lilacina —Soft lilac, shaded silver; useful variety | 1s. & 1 6 |

MEDAL AND DIPLOMA AWARDED TO US AT CHICAGO.

- | | Per pkt.—s. d. |
|---|----------------|
| 1013. Sparkler —Medium-sized flowers, of a most intense shade of crimson-red, bright and effective | 1s. 6d. & 2 6 |
| 1014. Eynsford Yellow —Pure white, large yellow centre; habit good and very uniform | 1s. 6d. & 2 6 |
| 1015. White —Of the purest white and highest quality flowers; habit good; very free | 1s. 6d. & 2 6 |
| 1016. White Perfection —A most lovely variety, very dark stems, grand fern-leaf foliage | 2s. 6d. & 3 6 |
| 1017. Finest Mixed —Containing nearly all the above kinds | 1s. 6d. & 2 6 |
| 1018. Primula, The Queen —White, slightly tinted, fine flowers; graceful fern-leaf foliage; useful | 1s. 6d. & 2 6 |
| 1019. Fringed, double white | 2s. 6d. & 5 0 |
| 1020. brilliant magenta-red | 1s. 6d. & 2 6 |
| 1021. all colours, mixed | 1s. 6d. & 2 6 |
| 1022. Capitata (Cashmeriana) Alba —Flower heads larger than those of <i>Denticulata Alba</i> , hp | 1s. & 1 6 |
| 1023. Floribunda Grandiflora Isabellina —Of soft and very pleasing pale sulphur, hp | 1s. & 1 0 |
| 1024. Japonica (Japanese Primrose) —A superb Alpine species, which has proved itself perfectly hardy, hp, 1½ ft. | 6d. & 1 0 |
| 1025. Kewensis —For the greenhouse; flowers fragrant and bright yellow; useful for cutting | 1s. 6d. & 2 6 |
| 1026. Obeonica Fimbriata —Edges of petals distinctly fimbriated; in colour from light to dark shades of lilac, hhp | 1s. & 1 6 |
| 1027. Rubra —A lovely colour | 1s. & 1 6 |
| 1028. Gigantea —Producing mostly lilac coloured flowers, 1½ inches across; a fine plant | 1s. & 1 0 |
| 1028A. Rubra —A really dark red colour | 1s. & 1 0 |
| 1029. Grandiflora —Fine flowers of a soft lilac tint, at times almost white; as free-flowering as the old type, hhp | 1s. & 1 0 |
| 1030. Rose Queen (Cannell) —Pretty and attractive; bright flesh-pink; a gem for table decoration, hhp | 1s. & 1 6 |
| 1031. Vesuvius —Of a true bright carmine-red, being an hybrid reproduces this much desired colour in a very satisfactory manner; flowers large, hhp | 1s. & 1 6 |
| 1032. Verticillata (Abyssinian Primrose) —Stout pyramidal heads of sweet scented flowers, in whorls, of a bright yellow; a fine pot plant. The germination being slow, hhp, 1 ft. | 1s. & 1 0 |
| 1033. Primrose, Cannells' "Beaconsfield Primroses, or Fancy Polyanthus" —Strong growers and most abundant bloomers; flowers of immense size, colours varying from a blue purple, dark maroon-scarlet, yellow, white, and other intermediate colours hp | 6d. & 1 0 |
| 1034. Common Yellow —True; seed gathered from plants growing wild, bp, ½ ft. | 0 6 |
| 1035. Cannells' Harbinger —Far in advance of all other whites, hp | 6d. & 1 0 |

CANNELLS' SEED GUIDE, 1910.

		Per pkt.—s. d.
1106.	Schizanthus Hybridus Grandiflorus —The poor mau's Orchid. Grows quite compact and pyramidal, and is literally covered with beautiful flowers, hha 6d. & 1 0	
1107.	— Red Shades —A beautiful mixture of pink and red shades 6d. & 1 0	
1108.	— Papilionaceous Pyramidalis —Charming variety of colours, hha, 1½ ft. 0 3	
1109.	— Wisetonensis —Charming and very attractive. The colouring of the flowers varies considerably from almost white with a yellow eye to a full rose with a bronzy-brown centre, hha, 1 to 1½ ft. 6d. & 1 0	
1110.	Senecio or Jacobæa (Donhle) —Free-flowering, gay-coloured flowers in great profusion. Mixed, hha, ¾ ft. 0 3	
1111.	Sempervivum Tabulæforme , The Table Plant—A splendid succulent, hhp, ½ ft. 1 0	
	Sensitive Plant —See <i>Mimosa Pudica</i> .	
1112.	Sidalcea Candida —Long spikes of pure white flowers, hp, 3 ft. 0 6	
1113.	— Listeri —A delicate satiny pink, hp 6d. & 1 0	
1114.	Silene Asterias Grandiflora —Free flowering, low bushes, upright flower stalks 2½ feet in height, large globular heads of crimson-scarlet flowers; flowering early in the spring, hp 0 6	
1115.	— Cannells' Pendula —Mixed, ha 0 3	
1116.	— Pendula, Pink —ha, 1 ft. 0 3	
1117.	— Fl. Pl. —A splendid double variety, flowers rose-carmine, ha, 1 ft. 0 3	
1118.	— Compacta Alba —Dwarf and compact, for edgings; white, ha 0 3	

		Per pkt.—s. d.
1119.	Silene Pendula Compacta Fl. Pl. —Peach Blossom, pretty, delicate pale pink, ha 6d. & 1 0	
1120.	— Ruberrima Fl. Pl. —Splendid variety; flowers red, ha, ½ ft. 0 3	
1122.	— Nana Compacta —A beautiful spring bedding plant; flowers bright pink, ha, 4 in. 0 3	
	Smilax —See <i>Myrsiphyllum</i> .	
1123.	— Asparagoides Myrtifolia —Of most elegant appearance; indispensable in high-class floral art, ge 1 6	
1124.	Sinningia, Dr. Masters —Brilliant rosy carmine, white throated flowers. Award of Merit 1 6	
1125.	— Regina Hybrida —They vary in colour from light rose to pale and deep lilac, adorned in some cases with a pure white throat, while in others the latter is delicately pointed, gp 1 6	
	Snapdragon —See <i>Antirrhinum</i> .	
1126.	Solanum Capsicastrum —These are beautiful for winter decoration, and are of easy culture, gsh, 1 to 1½ ft. 0 4	
1127.	— Laciniatum —Blue flowers, pretty pinnatifid foliage, fine, hhp, 3½ ft. 0 6	
1128.	— Marginatum —Leaves elegantly scalloped and margined silvery-white; useful for specimens or groups, hhp, 4 ft. 0 4	
1129.	— Pyracanthum —Very pretty; leaves covered with rich orange-tinted spines, hhp, 3 ft. 0 6	
1130.	— Robustum —Large effective foliage; the young leaves are of a rich bronze tint, hhp, 4 ft. 0 4	

CANNELLS' STOCKS.

		Per pkt.—s. d.
1131.	Perpetual Ten-week, Princess Alice —Snow white; fine for pot culture and cut flowers, hha 6d. & 1 0	
1132.	White Mammoth Ten-Week —Of robust growth; attains in the open ground a height of 3 feet, and produces only a single strong spike, 1 foot in length, closely covered with large well-formed flowers, hha 6d. & 1 0	

STOCKS, TEN-WEEKS OR SUMMER FLOWERING.

Large Flowering Ten-week—The most popular section of the summer flowering varieties; robust habit, well adapted either for exhibition purposes, bedding; pyramidal spikes of large double flowers of delightful fragrance, and in most varied and brilliant colours, hha, 1 ft.

1133.	FINEST MIXED, DOUBLE —Consisting of all the finest shades 6d. & 1 0	
1134.	COLLECTION of 18 distinct colours, separate, 3s. 6d.	
1135.	“ 12 “ “ 2s. 6d.	
1136.	“ 6 “ “ 1s. 6d.	
1137.	Anrora. 1141 Canary 1144. Chamois.	
1138.	Light Blue. “ Yellow. 1145. Purple.	
1139.	Rose. 1142. Crimson. 1146. Violet.	
1140.	Carmine Rose. 1143. Flesh colour. 1147. White.	

Per pkt., 6d. and 1s.

Dwarf German Ten-week—These will be found excellent for beds or pots, being very dwarf and compact, growing fine trusses of double flowers, hha, 1 ft.

1148.	FINEST MIXED 6d. & 1 0	
1149.	COLLECTION of 12 distinct colours, separate, 2s. 6d.	
1150.	“ 6 “ “ 1s. 6d.	

Giant Perfection, Ten-week—These are amongst the very finest for outdoor work, of vigorous pyramidal growth, and fine branching habit, long spikes of splendid large double flowers, hha, 2½ ft.

1151.	FINEST MIXED 6d. & 1 0	
1152.	COLLECTION of 8 distinct colours, separate, 2s. 6d.	
1153.	White. 1156. Rose. 1159. Dark Blue.	
1154.	Sulphur Yellow. 1157. Crimson. 1160. Chamois Rose.	
1155.	Flesh colour 1158. Light Blue.	

Per pkt., 6d. and 1s.

1160A.	Bismarck —Snowy white, extra large; late 6d. & 1 0	
--------	--	--

AUTUMN FLOWERING STOCKS.

Large-flowering Emperor—As a succession to the Ten-week Stock this class will be found useful; if sown in March will flower in the autumn, or if sown in June or July will bloom freely in spring; flowers large, double, and rich in colour. 1½ ft.

1161.	FINEST MIXED 6d. & 1 0	
1162.	COLLECTION of 12 distinct colours, separate, 2s. 6d.	
1163.	“ 6 “ “ 1s. 6d.	
1164.	White. 1167. Carmine. 1169. Light Blue.	
1165.	Flesh colour. 1168. Crimson. 1170. Dark Violet.	
1166.	Rose.	

Per pkt., 6d. and 1s.

East Lothian, Intermediate (Edinburgh Prize Strain)—Magnificent in beds or ribbon borders, also herbaceous borders; grows rapidly and flowers abundantly from August to January, hb, all 1½ ft. high.

1171.	White —Pure white; grand flowers 6d. & 1 0	
1172.	White (Wallflower-leaved)—Adapted for pots, as it seldom grows more than 1 foot in height; flower fine 6d. & 1 0	
1173.	Scarlet —Vivid colour; very choice 6d. & 1 0	
1174.	Purple —Grand 6d. & 1 0	
1175.	Mixed 6d. & 1 0	
1176.	East Lothian, Dark Lilac —Of a rich dark lilac colour. Strong flowers spikes. An excellent all-round variety. Useful alike for the market, beds, and cutting purposes, hb 1 0	
	Stocks, Intermediate —hb	
1177.	Scarlet	
1178.	White } This seed is saved from the best Covent Garden	
1179.	Purple } Stock 6d. & 1 0	
1180.	Mixed	

The Intermediate or spring-flowering Stocks are extensively cultivated for Covent Garden Market. In the early summer months, during the “London Season,” it constitutes one of the principal features in furnishing jardinettes, &c., and is also of great value in filling the early summer flower beds. The *East Lothian Stock* is more branching than the *True Intermediate*, and therefore not so well adapted for pot culture, but is more valuable for the flower garden. For autumn flowering sow early in spring; for spring flowering sow early in July, and winter in cold frame.

CANNELLS' SEED GUIDE, 1910.

SPRING FLOWERING STOCKS.

		Per pkt.—s. d.
	Early Large-flowering (Nice) Winter Stock —The flowers are larger than all the other kinds, the length of stems, floriferousness, and duration of its flowering season combine to render it a race of the first order.	
1181.	Almond Blossom —White, shaded carmine	} 6d. & 1 0
1182.	Bella Napoli —Deep pink or old rose	
1183.	Camaldoli —Dark violet	
1184.	Crimson King —Beautiful	
1185.	Monte Carlo —Delicate canary yellow	
1186.	Queen Alexandra —Rosy lilac	
1187.	Souv. de Nice —Pale flesh	
1188.	Vesuvio —Blood red	
1189.	COLLECTIONS of 8 varieties, 2s. 6d.	
1190.	MIXED	6d. & 1 0
	Brompton —A strong growing biennial variety very useful for winter or spring gardening. <i>Brompton Stocks</i> should be sown in June or July, and planted out in good soil in a sheltered position. They generally stand the winter without protection, and make a grand display in June and July. 2 ft.	
1192.	Large Flowering, Empress Elizabeth —One of the finest; flowers extremely large and well shaped. Bright rosy carmine; useful for cutting	1 0
1193.	FINEST MIXED	6d. & 1 0
1194.	COLLECTION of 12 distinct colours, separate, 2s. 6d.	
1195.	6 " " " "	1s. 6d.

		Per pkt.—s. d.
	Cocardeau, or Giant Cape —A vigorous growing and freely branching variety of <i>Brompton Stock</i> , and bearing large trusses of fine double flowers late in the autumn; distinct. 1½ ft.	
1196.	MIXED	6d. & 1 0
1197.	Statice Bonduelli —Light golden-coloured everlasting flowers, hhp, 1 ft	0 6
1198.	Eximia Flore Albo —White flowers. Blossoms when dried are useful for everlasting bouquets, hp	1 0
1199.	Suworowi —Branching flower spikes bright rose. Will last in flower more than two months, hha, 1½ ft.	0 6
	Other Varieties of Statice can be supplied.	
1200.	Stellaria Graminea Aurea , hp, 3 in.	0 6
1201.	Stenactis Speciosa , <i>syn. Erigeron Speciosus</i> —Purple flowers, hp, plants 2 ft. high	0 6
	Stipa —See Ornamental Grasses.	
1202.	Streptocarpus, Newest Hybrids —Of dwarf, neat habit; the flowers are trumpet-shaped. The variation of colours in these hybrids is very striking, and range from pure white, through pale lavender, lavender-blue, lilac-blue, light mauve, purple, violet, bright rose, and red to rich rosy purple, with all the intermediate tints. The whites are more pure and the markings on the throat more defined, gp	1s. & 1 6
	Sunflowers —See <i>Helianthus</i> .	
	Sweet Alyssum —See <i>Alyssum Maritimum</i> .	
	Sweet Sultan —See <i>Centaurea Moschata</i> .	
	Sweet William —See <i>Dianthus Barbatus</i> .	

CANNELLS' GOLD MEDAL SWEET PEAS.

SEVERAL ACRES UNDER CULTIVATION.

We devote much time and attention to the cultivation and selection of this indispensable and sweetest of all flowers. They will be found fully and accurately described, including the newest and most telling varieties from all parts of the world.

They are of easy cultivation and thrive almost anywhere, and if sown early ensures still greater success and certainty. So as to obtain the largest and finest blossoms a trench should be opened about 1 foot deep, and put in 3 inches of well-rotted manure, followed with 4 inches of soil, and well incorporate or mix, then proceed to sow the seeds over this, 3 inches apart along the row, and covering with earth to the depth of an inch. This should be done as early as the ground can be conveniently prepared in the spring, and as the young plants grow, fill up the trench around them with good soil. By doing this it affords the treatment and root protection they most appreciate, water and weak liquid manure being liberally supplied during hot dry weather. Under this method they will produce an enormous quantity of flowers, with long stalks, throughout the season, and a further advantage is gained if all old blossoms are picked off as soon as they begin to wither, and leaving one strong plant to every three or four sticks is a secret to success.

AWARDED TEN GOLD MEDALS FOR OUR SWEET PEAS.

THE DWARF CUPID VARIETIES.

An entirely distinct race of Sweet Peas, introduced in 1895, and differing widely from the usual tall vine-like growth, being of low, very compact spreading form. Plants are seldom more than 6 inches high, and form a dense mat of richest green foliage 15 inches or more in diameter.

This class will bloom much longer and more freely during hot, dry weather than any of the tall varieties.

		Per pkt.—s. d.

CANNELLS' WALLFLOWERS.

Per pkt.—s. d.

Wallflowers are prized for their delicious fragrance. In the Spring they are indispensable for beds, groups, and ribbons. The large massive conspicuous spikes of the double German varieties have a charming effect, while the more bushy compact growth and profuse blooming of the *Single Wallflowers* render them exceedingly attractive. A mass of *Golden Tom Thumb*, with its unalloyed rich golden orange blossoms, is a sight unrivalled, and so profusely does it bloom as to resemble a dense carpet of gold.

- | | | |
|-------|--|------------------------|
| 1391. | Cannells' Improved Maroon —The darkness and the perfume of this variety far exceeds all others, hp, 1½ ft. | 0 6 |

| 1418. | — Variegata (Striped Japanese Maize) —Free growing and very ornamental, 4 feet; leaves broad, alternately striped with green and white, lha. Sow in March. | 6d. per oz. 0 3 |

CANNELLS' FINEST EXHIBITION ZINNIAS.

In some seasons the first or early flowers of Zinnias do not come perfectly double, it is therefore best to allow a fair time to elapse before weeding them out.

Any time in April is quite early enough to sow the seed, which ought to be sown in gentle heat to get it to germinate. As soon as the plants are up stand near the glass to keep them strong and stocky, and after being pricked out into boxes and well rooted, harden off gradually for a week or so ready to plant out in rows a foot apart, and the same distance from plant to plant. To grow well and enable them to stand dry weather Zinnias require a good soil which has been deeply dug with plenty of rotten manure worked in, lha.

The Pinnula varieties, which are dwarf and compact, are admirably adapted for pot plants.

- | | | |
|-------|---|-----------|
| 1419. | Dwarf, Double Striped —Will produce 60 to 65 per cent. of striped flowers; range of colour includes a great variety | 6d. & 1 0 |
| 1420. | Elegans Fl. Pl. Crispa —The flowers are of perfect form, large and double, the petals being twisted, curled, and crested | 0 6 |
| 1421. | — Single—Mixed | 3d. & 0 6 |
| 1422. | — Double—Mixed | 3d. & 0 6 |

ORNAMENTAL GRASSES.

THESE beautiful, fine, feather-like Grasses are exceedingly ornamental, and are much grown—in fact, thousands are sold in Covent Garden, and they contrast most beautifully amongst high-coloured flowers either in pots or bouquets, Winter and Summer. Their culture is very simple, treat them similar to Asters, and they will be sure to give a charm to every garden. The following will be found the most useful:—

	Per pkt.		Per pkt.
1482. Agrostis Laxiflora—Pretty, ha, 1½ ft. ...	3d.	1497. Festuca Rigida—Elegant, distinct, glaucous blue, hp, 1 ft. ...	3d.

DOUBLE CHRYSANTHEMUM-FLOWERED ANEMONES.

These are the finest of all the Double Anemones, petals regularly imbricated like those of the Chrysanthemum-flowered Aster.

They are quite hardy and easily cultivated; the treatment of the ordinary double Anemones suits them well.

Of great value for forcing, for cut flowers, and for bedding; if planted in succession they can be had in bloom nearly all the year round.

In Fine Mixture, containing many beautiful varieties, 1s. 4d. per doz.; 9s. per 100.

HYACINTHUS (GALTONIA) CANDICANS.

A lovely hardy bulb, flowering in August. Single flowers are very valuable for bouquet work, colour white, and as many as twenty to forty are produced on each spike; a fine pot plant for the conservatory.

2d. each; 1s. per doz.; 7s. per 100.

DAHLIAS.

The finest and best kept collection in the world.

For Collections we have received more Awards than any other Firm.

The tubers can be sent by post to all parts of the globe. Capital presents to make to friends abroad.

30,000 Pot Roots for Propagation now ready for immediate delivery.

Our selection, 5s., 12s., and 18s. per dozen, from General Collection, as per "Floral Guide."

For varieties and descriptions see Dahlia List.

TIGRIDIA (Mexican Tiger or Iris Lily).

Before the frost take up the bulbs, and keep in a dry place until the time of planting in March or April. The following are the most distinct and beautiful varieties:—

Pavonia Grandiflora Alba—Ivory-white flowers, spotted with maroon and rosy lake in the centre, beautiful; a distinct and useful variety. 1s. 9d. per doz.

Grandiflora Aurea—Deep golden yellow, 2s. 6d. per doz.

Pavonia Grandiflora—From June until the frost sets in no flower so gorgeous or pretty was ever seen. Beyond planting in the ordinary way of a Tulip, nothing more is required. 1s. 6d. per doz.

Pavonia Grandiflora Lilacea—Distinct; purplish lilac, with white and purplish spots in centre. 1s. 9d. per doz.

Conchiflora—Orange and golden yellow, spotted with dark crimson. 1s. 6d. per doz.

Pavonia—Rich scarlet, tinged and spotted with yellow. 1s. 6d. per doz.

Mixed—1s. 3d. per doz. 8s. 6d. per 100.

TUBEROSES.

CULTURAL DIRECTIONS.—Pot into 60's, place in 65° temperature bottom heat, keep moist until roots have made a growth, then increase the temperature to 80°. When full of roots re-pot into 6-inch pots, and place near the glass; after bloom spike appears, place them in a cooler house, and train up under the glass. They must be well syringed, and amply supplied with liquid manure.

For other choice bulbous plants—viz., *Begonias*, *Achimenes*, *Cyclamen*, *Gloxinias*, and *Tropæolums*—see our Floral Guide and Bulb Catalogues, both sent post free on application.

American Tuberose (Double)—For choicest button-hole bouquets &c., no other flowers are of more value at all seasons than the Tuberose, and should be used in succession in every forcing house during the winter. 2s. per doz.; 12s. per 100. For delivery about Christmas.

ARUM SANCTUM (The Black Calla, *Arum Palestinum*, or Solomon's Lily).

These magnificent flowers often measure more than a foot in length by 5 to 8 inches in width; the inside colour is of the richest velvety purplish black imaginable, while the outside is of a pleasing green. The centre spadix rises to a height of 10 to 12 inches, and is of the deepest black. The foliage is solid in texture, rich deep green, and reticulated. Very attractive when growing in the greenhouse. Good plants in pots, 1s. 6d. and 2s. 6d. each.

TROPÆOLUM.

Tuberosum—Bears in summer a profusion of yellow and scarlet flowers; very suitable for creeping over rockeries. Per doz., 2s. 6d.; 3d. each.

LILIES.

The best and most useful varieties in cultivation. See Floral Guide.

Auratum (*The Golden-rayed Lily of Japan*)—One of the grandest of Lilies, 9d., 1s., and 1s. 6d. each; 7s. 6d., 10s. 6d., and 15s. per dozen. Bulbs in pots can be supplied if required.

Brownii—Interior pure white, exterior of a brownish shade; very fine. 1s. 9d.

Candidum (*The Old White Garden Lily*)—Still one of the best for forcing or borders, snow white. 4 ft. 3d. each; 2s. 9d. per dozen.

Longiflorum Giganteum—Flowers pure white, long and handsome; very free. 6d. and 9d. each; 5s. and 7s. 6d. per dozen.

Many other varieties can be supplied.

CHINESE SACRED LILY.

(*Narcissus Tazetta*.)

They may be grown either in soil in pots or water in a vase, but the latter method is to be preferred, as it lends itself more readily to artistic arrangement, and the bulbs bloom much earlier. They should be treated in the same way as Hyacinths, and can be planted at any time between October and March.

The flowers are exquisitely perfumed, and of a clear white colour, with bright yellow cup.

Each bulb sends up six or more strong spikes, and in a moderately cool room will bloom in about eight or ten weeks from the time of planting.

Each, 6d.; per doz., 5s.

We have imported a limited quantity of specially decorated Japanese bowls, as used in Japan for the cultivation of the Chinese Sacred Lily, which we can supply at the following prices so long as unsold.

1 bowl for 1 bulb	...	price 1s. 3d.
1 " 2 bulbs	...	1s. 9d.
1 " 3 " "	...	2s.
1 " 4 " "	...	2s. 6d.
1 " 6 " "	...	3s.

N.B.—The Chinese Sacred Lily sometimes produces double flowers.

CANNELLS' SEED GUIDE, 1910.

LILY OF THE VALLEY.

For forcing and planting outdoors.

Extra Strong Selected Clumps—For pot culture. 1s. 3d. each ; 12s. per doz.

Best Selected Crowns—For early forcing and general purposes. 1s. per doz. ; 6s. 6d. per 100.

Best Selected Dutch Crowns — For outdoor planting, &c. 6s. per 100.

Fortin's Giant Flowered—Very large handsome bells on long vigorous stems ; the best results are obtained by planting this variety outdoors. Flowering Crowns can be potted up and brought on very slowly under glass, but it is not advisable to do so before March, or else unsatisfactory returns will be the result.

Flowering Crowns. 8s. per 100.

MONTBRETIA (Tritonias).

Fine plants, flowering from July till frost sets in. Invaluable for cut flowers.

	Per doz.	Per 100.
Bouquet Parfait—Deep yellow, shaded vermillion	0 6	3 6

STRAWBERRIES.

What a lovely refreshing fruit! And when we hear it is the firm belief of the highest in the medical profession that if we were to eat more we should hear less of gout, rheumatism, and other pains; and seeing how easy Strawberries are to grow, it should be the set determination of all to cultivate their own, and have them, with all their beautiful freshness, morning and evening, as long as possible; and when so, they are one of the greatest charms and benefits that mankind can partake of. For full particulars of varieties and prices see our Autumn Catalogue.

CANNELLS' SEED GUIDE, 1910.

Come and See

Our Fruit Lands at Eynsford during the fruiting season, and inspect the very trees, and thousands of others similar, bearing extraordinarily fine fruit, and if any of our customers decide to plant we request a trial order to give the greatest confidence that our Trees are the best to be obtained.

Distinct sorts coming in for use at different seasons, fine bush trees to produce a crop in a year or two, similar to engraving, 6 for 9s., 12 for 16s., our selection. Packing, 1s. 6d. and 2s.

"GARDENERS' CHRONICLE" (Leading Article).

To show what the Old Country can do in the way of Apples and Pears, Messrs. Cannell exhibited tables of fruit, against which even those of Nova Scotia paled in comparison.

"GARDENERS' CHRONICLE."

BRITISH AND COLONIAL FRUIT.—When at the recent Exhibition of Home and Colonial Fruit at the new Hall, the Fruit and Vegetable Committee awarded Messrs. H. Cannell & Sons a Gold Medal for their very fine display of home-grown Apples, it was desired not only to mark the Committee's sense of the great excellence of the exhibit, but also as an acknowledgment of the enterprise of the firm in exhibiting at such a show such superb examples of British-grown Fruit. Most certainly it would have been a misfortune had the public patronizing the Show had no opportunity to note the merits of home-grown fruit when compared with that from our Colonies. That Kent County comprises an area from which come the finest Apples and Pears in the world is certain. North America may paint her fruit with richer hues than even Kent can, but not only are our fruits finer, but in quality are greatly superior. When there seems to be so much desire to exalt the productions of the Colonies at the expense of home productions, it is needful to make an occasional bold stand in favour of our little Britain.—A.D.

Kent has been acknowledged for centuries the Garden of England, and is to-day more manifest than ever. H. Cannell's establishments are situated in the midst of the largest fruit and vegetable market gardens in England. In consequence of the high quality of the goods being produced on the most favoured spot, Cannells' are universally known throughout the civilized parts of the world as supplying the best seeds and plants in the most perfect condition.

Half packets at half price of all Flower Seeds where priced 1s. and upwards, except collections and novelties.

For Penny Packets, see page 53.

GARDENERS.

Our Mr. H. Cannell, Senr., gives personal daily attention to all applications for Gardeners (good all-round men); his wide connection, and being a large employer, makes him either personally or intimately acquainted with most of the best practical and deserving men in the country, and he would feel a real pleasure in assisting and fitting in the right man to fill the situation for which any lady or gentleman may require him.

H. CANNELL & SONS

(Members of the Royal Horticultural Society of England),

Importers and Exporters of all New and Choice Plants, Florists' Flowers and Seeds, to and from all parts of the World.

FOREIGN AND COLONIAL NOTICES.

Plants and Seeds are despatched to India through the Indian Parcel Post, and also by the Ordinary Mail. Customers will kindly notify by which service they wish their parcels sent.

In America, Australia, India, and Cape Town, the general expression amongst both the trade and amateurs is—"None are so successful in exporting plants as Cannell & Sons"; consequently, we need hardly say our trade has increased to a very great extent.

When Soft-wooded Plants are received abroad, if dry, let them lie in milk-warm water for three to six hours, without removing the packing from the roots; then unpack and put in pots, according to size, place in a close glass case, being careful to shade from the sun until they make fresh growth.

All orders must be fully prepaid or accompanied by satisfactory reference.
EXPORT ORDERS COMMAND THE PROMPTEST ATTENTION.

SPECIAL TERMS TO SHIPPERS OF LARGE QUANTITIES OF SEEDS.

Telegraphic Address: "CANNELL, SWANLEY, ENGLAND."

A FEW POINTS WORTH ATTENTION.

FREE CARRIAGE OF SEEDS.—We send all Vegetable and Flower Seeds carriage paid to any place in the United Kingdom, **excepting Peas and Beans, Potatoes, Artichokes, and special quotations**, when any or all of these are ordered in small quantities, as in many such cases the carriage nearly, if not quite, absorbs the value of the goods.

Potatoes and sundries, &c., are only sent free if the value amounts to 20s. in England, and 40s. in Scotland and Ireland, and upwards, when we send the whole carriage paid. We do not pay carriage on Pot Plants, Trees, Shrubs, or Bulbs; but extra plants, &c., are added gratis in lieu of carriage.

EMPTY PACKAGES.—We charge at cost price, and allow two-thirds price if returned in good condition and carriage paid, and must be in all cases accompanied with sender's name and address and advised by post.

Although every care will be taken in the packing and sending of plants, seeds, &c., risk of every description must be borne by the purchaser immediately they are delivered to the Railway Company or Postal Authorities.

Every article is charged at the very lowest price. Our object is to give the ready-money buyers the advantage they are really entitled to. It may happen that prices lower than ours may sometimes be quoted. This invariably means false economy in a variety of ways—good things must be looked after by good men, who must be fairly paid and good strains are only procured by unceasing labour and care.

Full instructions as to the proper mode of forwarding must accompany each order, as it is calculated to expedite transit of goods, and save vexatious mistakes. All goods are advised the same day as forwarded, and the invoice posted as soon as possible afterwards.

Say by what rail. Please to write the address plain and in full on each order. No complaints entertained unless made immediately on receipt of goods.

The greatest care is exercised, and utmost liberality shown, when the selection of sorts is left to us.

It is particularly requested that all small orders under 10s. be accompanied with remittance to avoid the necessity of Booking, and very often the trouble of rendering and even re-rendering several times to our loss and probable annoyance to our Customers.

Cash with Order is a sound way of doing business, and it enables us to give you advantages in our goods and also prices.

All orders by post will be dealt with precisely as if given personally. Those who send above their value will have additional put in to make up the full amount.

We have every facility for keeping a large stock of everything enumerated in this Catalogue, and are therefore determined to adopt the system of quick sale and ready money. All who enclose remittances will be most liberally dealt with.

SEEDS AND BULBS FOR EXPORT.—All these are specially selected for Export Orders, and carefully and securely packed in tin-lined cases. Plants in suitable boxes.

Our establishments are open for business, &c., from 6 o'clock a.m. until 6 p.m., and 5 o'clock p.m. on Saturday. No visitors admitted on Saturday evenings and Sundays. Closed on all Bank Holidays.

Customers are particularly requested, when sending orders for friends (with their own), to do so on separate papers, with each address written plainly, to prevent mistakes.

WHEN SPECIAL QUOTATIONS ARE GIVEN, CUSTOMERS ARE KINDLY REQUESTED TO MENTION SUCH.

To avoid delay and disappointment, all business communications must be sent direct to the firm addressed "**H. CANNELL & SONS**," otherwise they will remain unnoticed.

Telegraphic Address, "**CANNELL, SWANLEY**." G.P.O. Telephone, No. 3, Swanley Junction.

Post Office and Postal Orders to be made payable at Swanley Junction, Kent, and crossed "**& Co.**"

All Cheques to be made payable to **H. CANNELL & SONS**, and crossed **Martin's Bank, Swanley, Kent**.

Not as in co-operative societies, do we demand payment beforehand, unless from unknown correspondents, when satisfactory references to bankers, or some person already known, are equally acceptable. So as to encourage quick returns and but small profits, we allow 5 per cent. discount (excepting Collections of Seeds, and which are strictly nett) on all payments made within 14 days of date of invoice, but after that date must be remitted in full. When special prices are quoted, accounts are payable one month from date of invoice and no discount. We cannot undertake to send a receipt for payments under 2s. 6d., unless the return postage is sent us.

We hope all customers will apprise us of change of address, thus saving the annoyance to them of redirection and surcharge by postal officials and loss of double postage to us when returned; a halfpenny card would thus save us a shilling, and often pounds. Should any Customers not receive our Catalogues at the usual seasons of the year, we shall be pleased to send copies of same upon hearing from them. Many are lost in transit.

NOTICE.—We grow our own Seeds, and every possible pains taken, and the strictest attention is paid to have and supply every item as per Catalogue; but there are so many always anxious to rush into litigation for the sake of compensation for any trifles, and failures which may occur over which perhaps we have no control, that we are compelled to issue this notice:—

H. CANNELL & SONS give no warranty, express or implied, as to description, quality, productiveness, or any other matter of any goods they send out, whether planted by their own men or not, and they will not be in any way responsible for the crop, or for any promises their employees may make. If not accepted on these terms the goods are to be returned. Every personal effort is made to give the utmost satisfaction, and no complaints can be entertained unless made immediately on receipt of goods. (These conditions will be found in all Seed Catalogues.)

We have received intimation from the various Railway Companies that for the future they will not pay any claims for damage or delay of goods sent at "Owner's Risk" rates; we therefore beg to inform our customers that our responsibility ceases as soon as goods are delivered into the hands of the Railway Company, and, in justice to ourselves, we cannot supply otherwise than on these conditions. All goods forwarded at "Owner's Risk" effect a great saving in cost of carriage, and which we consider of great interest to our patrons; we shall therefore continue to dispatch parcels at "Owner's Risk" unless specially requested to forward them at "Company" Risk.

By Royal Warrant Manufacturers
HIS MAJESTY

of Horticultural Machinery to
THE KING.

Ransomes' Lawn Mowers

THE BEST IN THE WORLD.

GOLD MEDALS—Royal Botanic Society, 1904, 1905, & 1906.

**All correspondence to Swanley. Telephone No. 3. G.P.O.
SWANLEY JUNCTION.**

**The Cockmannings Nursery (20 acres of Shrubs) is $1\frac{1}{2}$ miles from
St. Mary Cray Station. Conveyances, if intimated a day before.**

Our Trade Mark is—"COME AND SEE."

Cannells' Kentish Seeds.

THE BEST.

Wonderful Success all over the World.

AS EVIDENCE,

at the Franco-British Exhibition

they were awarded

by the International Jury

Two First Prizes

and Two Gold Medals

owing to their superior excellence.
